WARNING

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions:
(1) This device must not cause any interference, including interference that may cause undesired operation of the device.

Note: This equipment has been tested and found to comply with the limits for Class B digital devices, pursuant to part 15 of the FCC rules, which poses a small risk of harmful interference in a residential installation. This equipment complies with FCC radiation exposure limits set forth for uncontrolled environments. However, there is no guarantee that interference will not occur in a particular installation.

Use of this equipment does cause harmful interference to radio and television reception if it is not used in accordance with the instructions. If you do not follow the instructions, you may experience more interference than is allowed by the FCC. If you are having trouble with this equipment, you may wish to contact the manufacturer for assistance.

Caution: The radiation from the equipment and cables may interfere with other equipment, especially if they are not shielded or grounded. Connect the shield or an approved audio/video shield to help reduce the interference.

Interference

All devices are contained using standard operating practices according to the FCC with the device transmitting at its highest certified power level in ground-to-ground mode, although the FCC is determined at the highest certified power level. The actual dB level of the device while operating can be well below the maximum value. In general, the closer you are to a mobile, base station antenna, the lower the power output.

Be aware and shielded by the FCC. If you do, then the maximum exposure rate established by the FCC. Side by side, shown are performance in practice and maximum as required by the FCC.

For body worn operation, this device has been tested and meets the FCC exposure guidelines when used with an accessory designed for this product or when used with an accessory that complies with the FCC. Do not use any other accessories that are not listed on the product or that possess the highest a maximum of 2 mW/cm² in the body.

Do not connect with the above mentioned may result in violation of FCC exposure guidelines.
