

Conducted Emissions - Front View

A photograph of a wooden workbench. On the left side of the bench, there is a black power strip with two circular outlets and several rectangular outlets. A black power cord is plugged into one of the rectangular outlets. To the right of the power strip, a black mobile phone is lying on the wood. The phone has a white label on its back with text that is partially legible, including "TCL" and "X600". A white charging cable is plugged into the bottom of the phone. The workbench is made of light-colored wood with a visible grain and some scratches. In the background, there is a grey metal structure and some other equipment, including a white power supply unit and some orange and white cables.
