Battery installation and charging instructions:
Open the remote control car battery cover. Install 6V charging batteries set, and close the batteries cover. Lighten the screws.

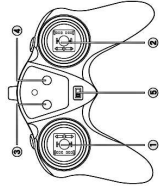

Frequency Pairing:
This toy uses 2.4GHz remote control, before playing the remote and car need to pair up.
1. Turn the switch of the car ON 2. Within 5 seconds turn on the transmitter.
At this point the remote will pair up with its car and the lights of the remote will stop blinking. The toy is now ready to use.

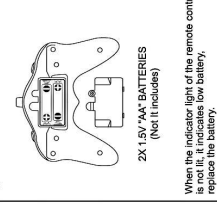

Remote Control Operation:

- Forward: Push both levers up
- Turn Right: Push right lever up and left lever down at the same time
- Turn Left: Push left lever up and right lever down at the same time
- Raise Bed: Button
- Lower Bed: Button
- Power On/Off

Open the remote control battery cover, and close the batteries cover. Lighten the screws.

Battery use instruction and Cautions:

- Batteries must be inserted with the correct polarity. Do not mix different types of batteries or new and used batteries.
- Only the recommends or the same types batteries can use with the car.
- The supply terminals can not be short circuited.
- Exhausted batteries must be removed from the car.
- Non-rechargeable batteries should not be charged.
- The batteries are only to be charged under adult supervision.
- The batteries must be removed from the toy before charging.
- The user need to be regularly examined for the damage of the wire, plug, shell and related part. In the event of such damage, stop using until the damage has been repaired. Do not break off the antenna of the controller.
- On the sharp part may cut you.
- If the RC car should use the non-rechargeable battery set, RC controller should use 2x1.5V "AA" alkaline non-rechargeable battery.

WARNING:
CHOKING HAZARD - small parts,
Not for children under 3 years.
