## FUNCTIONS - PORTS

---

### 3.5mm Aux-In Jack

While unit is powered on, insert a compatible audio cable, and the unit will beep to indicate a successful connection.

### Charging Port

Use the provided Type-C cable to connect to a compatible DC5V-1A adapter or any computer USB to charge the unit.

### Built-In Reset Button

Press the reset button with a needle or sharp object to reset the speaker to factory settings.

## FUNCTIONS - PORTS

---

### 1. Turning On The Speaker

Press and hold the power button to turn the speaker on. Once turned on the speaker will emit a tone, and once the blue LED light flashes, the speaker is ready to be connected.

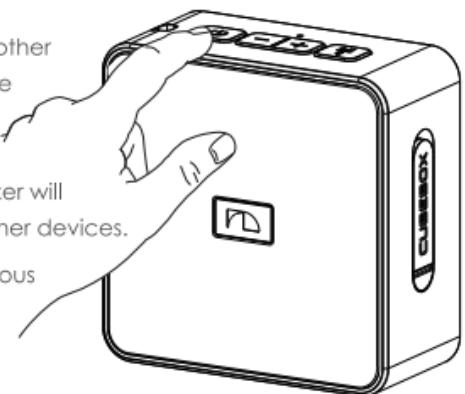

### 2. Paring a Bluetooth Device

Activate the bluetooth on your device, and search for CUBEBOX. Once the bluetooth connection is complete, the speaker will emit a beep and the blue LED light will stay on. The speaker will automatically reconnect to the last paired device the next time the speaker is turned on.

### Other Instructions

To pair the speaker to another device, press and hold the bluetooth button to disconnect from the current device, the speaker will then be detectable to other devices.

To reconnect to the previous device, press the button briefly to reconnect.

## **FCC Statement**

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

To assure continued compliance, any changes or modifications not expressly approved by the party.

Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

## **FCC Radiation Exposure Statement:**

The equipment complies with FCC Radiation exposure limits set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
