

Modular Approval Declaration Letter

REVISION TABLE

Rev	Description of Change	Date	Approved
1.0	Original Release(Obsolete)	06/14/2012	QM
2.0	Updated Template(Obsolete)	10/01/2012	QM
2.1	Updated address (Obsolete)	01/10/2014	QM
3.0	Updated Template(Obsolete)	03/30/2015	QM
3.1	Updated Address	06/21/2018	QM
3.2	Changed File Name and Split Files FCC/IC	7/16/2018	QM
3.3	Update company name and reflect FCC rule	7/15/2024	QM

WIZnet H.K. LTD.

FCC Modular Approval Attestation

- Single Modular Approval
- Single Limited Modular Approval (LMA)
- Split Modular Approval
- Split Limited Modular Approval (LMA)

FCC ID: 2ATUB-WIZFI360PA

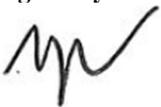

FCC Part 15.212 Requirements:

Please state details about how the following requirements could or could NOT be met; and state how control of the end product, into which the module will be installed, will be maintained by the applicant/manufacturer, such that full compliance of the end product is always ensured.

<input checked="" type="checkbox"/>	15.212 (a)(1)(i): The radio elements of the modular transmitter must have their own shielding. The physical crystal and tuning capacitors may be located external to the shielded radio elements.	This module has own shielding.
<input checked="" type="checkbox"/>	15.212 (a)(1)(ii): The modular transmitter must have buffered modulation/data inputs (if such inputs are provided) to ensure that the module will comply with part 15 requirements under conditions of excessive data rates or over-modulation.	All inputs to the modules are buffered through logic or microprocessor inputs.
<input checked="" type="checkbox"/>	15.212 (a)(1)(iii): The modular transmitter must have its own power supply regulation.	A low drop out regulator issued for modular power supply regulation.
<input checked="" type="checkbox"/>	15.212 (a)(1)(iv): The modular transmitter must comply with the antenna and transmission system requirements of § 15.203, 15.204(b) and 15.204(c). The antenna must either be permanently attached or employ a “unique” antenna coupler (at all connections between the module and the antenna, including the cable). The “professional installation” provision of § 15.203 is not applicable to modules but can apply to limited modular approvals under paragraph (b) of this section.	Device is equipped with integral antenna.
<input checked="" type="checkbox"/>	15.212 (a)(1)(v): The modular transmitter must be tested in a stand-alone configuration.	The module has been tested in a stand-alone configuration.
<input checked="" type="checkbox"/>	15.212 (a)(1)(vi): The modular transmitter must be labeled with its own FCC ID number.	The modular has a permanent fixed label.
<input checked="" type="checkbox"/>	15.212 (a)(1)(vii): The modular transmitter must comply with any specific rule or operating requirements applicable to the transmitter and the manufacturer must provide adequate instruction along with the module to explain any such requirements.	The module comply with all specific rules applicable to the transmitter including all the conditions provided in the integration instructions by the grantee.
<input checked="" type="checkbox"/>	15.212 (a)(1)(viii): The modular transmitter must comply with any applicable RF exposure requirements.	A minimum distance between modular and all AEs are longer than 20cm.

If a module does NOT meet one or more of the above listed requirements, the applicant may request Limited Modular Approval (LMA).
