Solder Board-Component View 1	 A photograph of a green printed circuit board (PCB) with various electronic components. The board is oriented vertically and is placed next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's length being approximately 100 mm. The components include several integrated circuits, capacitors, and a red connector at the bottom. The board is labeled with 'WTS20X09068167W' and 'Rev1.0'.
Solder Board-Component View 2	 A photograph of the same green PCB from a different angle, showing the underside. The board is oriented horizontally and is placed next to a black ruler with white markings. The ruler shows measurements in millimeters, with the board's width being approximately 50 mm. The components include several integrated circuits, capacitors, and a red connector at the top. The board is labeled with 'WTS20X09068167W' and 'Rev1.0'.

Solder Board-Component View 3	 A photograph of a green printed circuit board (PCB) component. The board is rectangular and populated with various electronic components, including integrated circuits, resistors, and capacitors. It features three connectors on the left side: a red one at the top, a black one in the middle, and a blue one at the bottom. The board is placed on a blue surface next to a black ruler with white markings in millimeters. The ruler shows the board is approximately 100mm wide and 60mm high.
Solder Board-Component View 4	 A photograph of a black rectangular L-ion battery. The battery has a label with technical specifications and safety warnings. A black cable with a connector is attached to the top of the battery. The battery is placed on a blue surface next to a black ruler with white markings in millimeters. The ruler shows the battery is approximately 100mm long and 30mm wide.
