

EXHIBIT 1 - PRODUCT LABELING

Proposed FCC Label Format

Specifications: Text is Black in color and is justified. Go to Settings and touch System about Phone to view FCC ID for the product. Products must not require special accessories or supplemental plug-ins (e.g., the installation of a SIM/USIM card) to access the information. The FCC ID, warning statements, or other information must be displayed electronically in a manner that is clearly legible without the aid of magnification. Both regulatory information and dedicated exclusive application(s) or script(s) must be secured and implemented in a factory-set-unalterable format. A physical temporary label is also required on the product, or a label on the packaging, at the time of importation, marketing, and sales. The physical label can be a summary version of the required regulatory information, such that the product can be identified as complying with the FCC's equipment authorization requirements.

Proposed Label Location on EUT
