1 STARLINK | REGULATORY NOTICES | ENGLISH

This document provides country- and region-specific non-wireless and wireless regulatory notices and compliance information for your product. Some of these notices may not apply to your product.

PRODUCT DESCRIPTION
Starlink is a satellite internet connectivity system comprised of the Starlink Dish, Wi-Fi Router, and AC Power Supply. The Starlink dish operates on DC power supplied by an external AC Power Supply or Router rated 100 – 240V, 50/60 Hz. For regulatory identification purposes, your product is assigned a Regulatory Model Number which is located on the back of the product. If required, regulatory markings for your country or region are located on the back of the unit.

STARLINK KIT:
- Starlink Dish Models: UTA-212, UTA-221, UTA-222, UTA-232, or UTA-252
- Starlink Power Supply Models: UTP-221, UTP-231*x*, UTP-232*x*, UTP-241*x*, UTP-251*x*, or UTP-252*x*
- Wi-Fi Router Model: UTR-211, UTR-231, UTR-232, or UTR-251*x*.

WARRANTY
Review the Starlink Kit's Limited Warranty at www.starlink.com/legal/warranty

ENVIRONMENTAL SPECIFICATIONS

	OUTDOOR	INDOOR
Model Numbers	UTA-212, UTA-221, UTA-222, UTA-222-R, UTA-231, UTA-232, UTP-221, UTP-221-R, UTP-231*x*, UTP-232*x*, UTP-241*x*, UTP-251*x*, UTP-252*x*	UTR-211, UTR-231, UTR-232, UTP-243, UTP-251*x*, UTP-252*x*
Temperature, Operating	-30°C – +50°C -22°F - 122°F	0°C – +40°C 32°F - 86°F
Relative Humidity (non-condensing), Operating	10% - 90%	20% - 80%

INSTALLATION CONDITIONS
⚠ **WARNING!** The power supplies UTP-243, UTP-251*x*, and routers UTR-211, UTR-231, UTR-232 and UTR-251*x* are restricted to indoor use only.
⚠ **WARNING!** Mounts are not designed for high winds or hurricane/tornado wind loads. Starlink should not be used in all cases to prevent failure in an unexpected wind event. See installation instructions before connecting this equipment to the input supply.

Regulatory labels – which provide country or regional regulatory information – may be physically located on the bottom, side, or back of the unit. Some products may provide electronic regulatory labels (e-labels) that can be accessed through the Graphical User Interface (GUI) on a device with a screen.
NOTE: Electronic labels are not available on all products.
NOTE: Devices not for sale or use in the United States may not contain an FCC ID.

To view electronic regulatory label on connected device (e.g., phone, tablet, PC) via Starlink GUI, open Starlink App. STARLINK GUI => Support => Legal => Regulatory Label

SAFETY NOTICES
⚠ **WARNING!** To reduce the risk of injury, electric shock, or fire, follow basic safety precautions, including:
- Make sure the product's power is disconnected before accessing, moving, or installing the Starlink dish. Starlink dish contains moving parts when powered on.
- Plug the power supply or AC outlet AC outlet is easily accessible at all times. If the power cord has a 3-pin attachment, plug the cord into a grounded (earthed) 3-pin outlet. If the power supply or router are used in wet locations, a power cord is plugged into a ground-fault circuit interrupter (GFCI) or Residual-Current Device (RCD) equipped AC outlet.
- Only use the AC adapter and power cord provided with the system or purchased from SpaceX.

PRODUCTS CONTAINING RADIO TRANSMITTERS
Starlink Kit's Wi-Fi Router, and AC Power Supply. The Starlink dish operates on DC power supplied by an external AC Power Supply or Router rated 100 – 240V, 50/60 Hz. For regulatory identification purposes, your product is assigned a Regulatory Model Number which is located on the back of the product. If required, regulatory markings for your country or region are located on the back of the unit.

STARLINK KIT:
- Starlink Dish Models: UTA-212, UTA-221, UTA-222, or UTA-232
- Starlink Power Supply Models: UTP-221, UTP-231*x*, UTP-232*x*, UTP-241*x*, UTP-251*x*, or UTP-252*x*
- Wi-Fi Router Model: UTR-211, UTR-231, UTR-232, or UTR-251*x*.

WARRANTY

Dokumen ini menjelaskan pemberitahuan penerbangan untuk kebijakan Starlink di Indonesia, mulai dari pemasangan hingga penggunaan.

PENGANTAR

Terminal Starlink terdiri dari antena datar dengan dudukan penyetel, kabel, dan catu daya. Pemasangan yang tepat memastikan koneksi yang andal dan meminimalkan gangguan pada penerbangan lain.

PEMASANGAN

Pasang antena di tempat yang memiliki pandangan langit yang jelas dan tidak terhalang. Hindari pemasangan di dekat antena navigasi penerbangan atau radar. Ikuti panduan pemasangan yang disertakan untuk pemasangan yang aman dan stabil.

DAYA

Hubungkan terminal ke sumber daya yang sesuai menggunakan kabel yang disediakan. Pastikan tegangan dan polaritas benar sebelum menyalakan. Gunakan pelindung lonjakan untuk melindungi perangkat dari kerusakan akibat petir.

JARINGAN

Sambungkan terminal ke router Wi-Fi atau perangkat jaringan menggunakan kabel Ethernet. Amankan jaringan Wi-Fi dengan kata sandi yang kuat dan aktifkan enkripsi untuk mencegah akses yang tidak sah.

PENGOPERASIAN

Setelah terpasang dan terhubung, terminal akan secara otomatis mencari satelit dan membentuk koneksi. Proses ini biasanya memakan waktu beberapa menit. Pastikan antena memiliki pandangan yang jelas selama proses ini.

PEMELIHARAAN

Bersihkan antena secara berkala untuk menghilangkan kotoran dan salju yang dapat mengganggu sinyal. Periksa kabel dan sambungan secara berkala untuk memastikan tidak ada kerusakan atau longgar.

PEMECAHAN MASALAH

Jika terminal tidak berfungsi dengan benar, coba mulai ulang perangkat dan periksa sambungan kabel. Jika masalah berlanjut, hubungi dukungan pelanggan Starlink untuk bantuan.

KEAMANAN

Jauhkan orang dan hewan peliharaan dari jarak dekat saat antena sedang beroperasi. Jangan menatap langsung ke antena saat sedang menyala. Matikan terminal saat tidak digunakan untuk menghemat daya.

KEPATUHAN

Pastikan penggunaan terminal mematuhi peraturan setempat. Beberapa negara mungkin memerlukan izin atau lisensi untuk penggunaan satelit. Hubungi otoritas penerbangan setempat untuk informasi lebih lanjut.

DUKUNGAN

Untuk bantuan lebih lanjut, kunjungi situs web dukungan Starlink atau hubungi tim dukungan pelanggan. Mereka dapat membantu dengan pemecahan masalah, penggantian perangkat, dan pertanyaan lainnya.

LAMPIRAN

Lampiran ini berisi informasi tambahan, termasuk spesifikasi terminal, diagram pemasangan, dan daftar bagian yang disertakan. Lihat lampiran untuk detail lebih lanjut.

GLOSARIUM

Glosarium ini mendefinisikan istilah dan akronim yang digunakan dalam dokumen ini. Lihat glosarium untuk penjelasan istilah yang tidak familier.

REFERENSI

Bagian referensi mencantumkan sumber dan bacaan lebih lanjut. Gunakan bagian ini untuk menemukan informasi tambahan tentang topik yang dibahas dalam dokumen ini.

PERSETUJUAN
