

User Manual

Remote Control

Model: VRF-DR

About the use of remote control lamp instructions and operating procedures:

1. 2.4G part of the code, remote control distance of twenty-five meters. Every keystroke operation, LED signal two (right) will flicker.
2. At the same time, press and hold the power button ON and the brightness + button to turn ON the power, and the light will automatically blink five times. The code matching is successful.
3. According to the identification on the remote control:
 - K1. Represents the switch light key,
 - K2. Represents the brightness of the lamp +,
 - K3. Pinhole represents the CCT color key,
 - K4. Represents the brightness of the lamp -,
 - K5. Represents the light off key.

4. Decoding: press and hold the on and CCT keys simultaneously for five seconds, the light will flash seven times, and the decoding is successful.

5. Wireless charging part

When the remote control is placed on the charger, the remote control will automatically charge. LED signal one (left) will flash to indicate charging.

Charging current: 0.1-50mA

Battery capacity: 70-90mA

Charging voltage: 3.8-4.5V

Ambient temperature: $-10 \sim 55^{\circ}\text{C}$

Wireless frequency: 2426 - 2470MHz

Modulation mode: GFSK

Antenna gain: 0 dBi

The rest of the hardware is based on specifications and physical objects.

FCC Statement:

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) This device must accept any interference received, including interference that may cause undesired operation.

FCC Radiation Exposure:

The device has been evaluated to meet general RF exposure requirement . The device can be used in portable exposure condition without restriction.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
