Smart bulb
FCC ID: 2A2NW-WSLB
This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1° Reorient or relocate the receiving antenna.
2° Increase the separation between the equipment and receiver.
3° Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
4° Consult the dealer or an experienced radio/TV technician for help.

Radiation Exposure Statement
To comply with FCC RF exposure compliance requirements,this grant is applicable to only mobile configurations. The antennas used for this transmitter must be installed to provide a separation distance of at least 20cm from all persons and must not be co-located or operating in conjunction with any other antenna or transmitter.

Group Control

1. Tapa a smart bulb in the device list to enter the its control panel.

2. Tap the edit icon   3. Click ' Create Group '
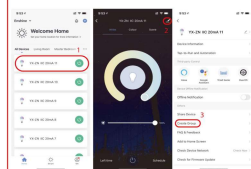

Group Control

4. Select devices for unified management.   5. Tape 'confirm' to complete the setup.
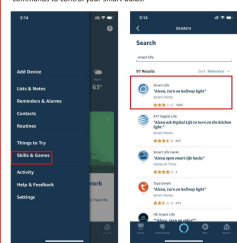

Now, you can use group control to control multiple bulbs

Alexa Settings

Enable the Smart Life skills in the Alexa APP, then log in your Smart Life account, it will automatically sync your smart bulb to Alexa.

After the synchronization is successful, you can use voice commands to control your smart bulbs.

Google Assistant Settings

Tap 'Add' - 'Set up device' - 'Have something already set up?' - search for 'Smart Life' to add it and log in your smart life account.

Frequently Asked Questions

1. What should I do when my device fails to connect to the network?

--Check whether the router password you entered is correct.

--Ensure that broadcasting is enabled for Wi-Fi and is not hidden. Ensure that your device has been added over a Wi-Fi band of 2.4 GHz.

--Ensure that the network environment has strong and stable signals. Troubleshooting: Place your mobile phone or iPad connected to the same local area network close to the device, and open a web page to check whether the browsing is smooth and stable.

--If the network is normal but the device network connection still fails, check whether the router is overloaded. You can disable a device's Wi-Fi feature to reserve the channel for resource reallocation.

--If wireless MAC address filtering is enabled for the router, remove your device from the router's MAC address filtering list to ensure that it is allowed to connect to the network. You can also disable MAC address filtering.

If your device still fails to connect to the network after the preceding steps, please contact ledeply@gmail.com to let us troubleshoot this issue

---

2. The light changed from flashing to regular, but it still fails to connect?

--Please check if the Wi-Fi password you entered during network configuration is correct.

--Please keep the distance to the router during the network configuration (within 1 ~ 5 meters, there must be no metal spacers in the middle)

--The smart device that your router's CPU can load has reached the upper limit. Please disconnect some devices and try again.

--The device does not reset after the network configuration fails. You can try the network configuration again after the device is reset.

3. My smart bulb was disconnected, how can I reset it?

EZ Mode:

--Make sure the device is powered off for more than 10 seconds before powering on the device.
--Turn on and off ten times (on-off-on-off-on) power of the device (2 to 4 seconds between each on and off). Wait a few moments until the lighting starts blinking rapidly.

AP Mode:

--No need to power down the device, but need to keep the lighting device blinking rapidly. Then turn on and off three times (on-off-on-off-on) power of the device (2 to 4 seconds between each on and off). Wait a few moments until the lighting starts blinking slowly.

---

4. If my Wi-Fi/Internet goes down, will ENSHINE smart bulbs still work?

LEDEPLY products need to be connected to Wi-Fi in order to use them remotely.

5. Can I share with family and friends?

Yes, you can share your bulbs with family and friends who will have access to control your bulbs. In the Smart Life app, press the Profile button and click on the 'Share Device' button, and you will be able to give or revoke sharing permissions. In order to share, the other user should already have downloaded the Smart Life app and registered a new account.

6. The bulb appears offline or unreachable, what should I do?

Check the light switch and make sure that it is switched ON. The light bulb requires an 'always-on' power supply to operate properly. Make sure your Wi-Fi router is online and in range. When your change the Wi-Fi password, the bulb will disconnect, you can turn on-off 10 times to reset and reconnect it.

7. What's the Wireless Range?

The range of your home Wi-Fi is heavily dependent on your home router and the conditions of the room. Check with your router specifications for exact range data.
