### **Product Introduction:**

This product is developed for point-to-point / point-to-multipoint solution used in unlicensed wireless deployment for backhaul working at 4.9 to 5.9 GHz band, which enables the Wi-Fi service provider to deploy the Wi-Fi network and distribution in an efficient way. Using the Wi-Fi alliance standard as a benchmark for OFDMA technology, the RF medium would be utilized with the planning for non-overlapping and for the best end-user experience. The solution provides a cost-effective solution and reachability of the network to remote areas in an easier way.
