Wireless charger

Product introduction

Thank you for choosing our product! This product is a simple wireless charger, which supports fast charging for Qi-enabled devices. Please read the instructions carefully in order to quickly understand the parameters and the performance before using it.

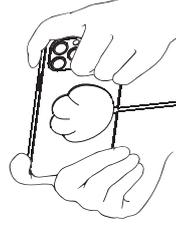

Basic parameter

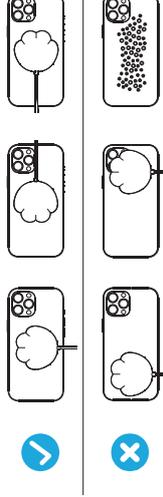

Product name: wireless charger
Product model: CP001
Product size: 61*58*15mm (comes with 1.5M charging cable)
Input: 5V/2A, 9V/1.67A
Output: 5V/7.5/10/15W(Max)
Frequency: 115-205KHz
Conversion efficiency: > 73%
Charging distance: < 5mm
Compatible devices: Qi-enabled devices.

Function introduction

① Please connect the wireless charger to the power supply, make the sucker attach to the back of the phone, and the wireless charger will be charging when it is aligned.

② Please keep the center position of the mobile phone aligned with the center position of the wireless charger when charging (Refer to the following pictures for placement).

③ If the charger cannot charge properly, it may be in the wrong or protection state. Please check whether there is any metal foreign body placed in the position of the wireless charger. Remove the foreign body (if there is) so that the charger can work normally.

Matters needing attention

- In order to protect the sucker adsorption, it is recommended to remove the phone case or use the smooth ones. Please use the wet cloth to wipe the surface before using.
- Please use the PD 2.0 or QC3.0 adapter (with the output voltage of 9V/1.67 A or higher) when using it, so that the wireless charger can work at high power.
- The wireless charger has the overvoltage and overvoltage input protection. The output power will be turned off or reduced if used improperly. Please check whether the device is abnormal or improperly used.
- If there is intermittent charging or serious heating during charging, it may be that the receiving coil of the mobile phone and the wireless charging coil are not aligned. Please stop charging and try to cool the mobile phone before charging again.
- Do not place the metal objects (including iron sheet, ring and metal shell etc) on the contact surface of wireless charger when charging.
- Please keep the ambient temperature at 0-26 °C. Do not place the charger in water, fire, or high temperature (over 40 °C) and low temperature (below 0 °C). Do not allow children to touch the accessories.
- Incorrect use or placement of the product may lead to reduced service life or damage to the product. The resulting liability does not belong to the manufacturer or the manufacturer's responsibility. Thanks for understanding.
- Please clean the product with dry soft cloth. Do not use chemicals, detergent.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

Radiation Exposure Statement

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment.

This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
