

If you don't find information about the correct torque, please reach out to [support@starkfuture.com](mailto:support@starkfuture.com) for clarification.

## Check the wheel and tires:

- 1 Make sure that the tires are inflated to the required pressure and in good condition. The required pressure is stated on the tire. Make sure any flat tires are fixed before riding, see [§Replacing parts](#).
- 2 Slowly rotate each wheel:
  - a Inspect the side walls and threads of the tire. Look out for cracks and objects that may be stuck in the outer layer.
  - b If the wheel wobbles or appears to be off-center, your wheel must be inspected. Consult a skilled technician.
  - c Check the rims for damages. Damage to the rim causes weak spots and can result in a faulty wheel over time.

## Check the brakes:

- 1 While stationary: Squeeze each **hand brake** or the optional **foot brake** to make sure that there is resistance.
- 2 If there is no resistance: Contact support or your local dealer.

- 3 If there is too much resistance or the **brakes** make a squealing sound: the **brakes** might require adjustment. See §Adjusting the brakes.

## Check the handlebar brakes:

- Check for cracks, cuts or signs of wear: These can all have an impact on how the **grip** is fitted onto the **handlebars**. Worn or loosely fitted **handlebar grips** can slip off, potentially resulting in loss of control and falling.

## Check the battery:

- Check the **battery** charge status.

## Check the cables:

- Check the **exposed cables** for cracks, cuts or signs of wear.

## Check for updates:

- 1 Turn on the motorcycle by pressing the **On/Off button** for 2 sec on the control switch.
- 2 Check the color of the **light** on the control switch.
- 3 If the **light** on the control switch is **magenta**, the motorcycle needs to be updated. Do this by holding both the **+** and **- button** on the control switch for 5 seconds.

## 6.2 CLEANING THE STARK VARG AFTER USE

Make sure that you clean your motorcycle after every use. It gives you the chance to spot any faults or defective parts before they develop into anything serious.

## NOTICE

Stark Future's mission is to lead the way toward a sustainable motorcycle industry, by reducing plastic and CO<sub>2</sub> pollution. When possible, use non-plastic, reusable, sustainable materials that do not cause harm for the environment.

### Required tools and supplies:

- Clean cloths
- Sponge
- Bucket
- Brushes
- Neutral non-aggressive cleansing agent (pH value of between 6 and 8)
- Chain degreaser

### To clean the Stark VARG:

- 1 Make sure the motorcycle is standing upright and stable, preferably on the **side stand**.
- 2 Make sure the Stark VARG is turned off.
- 3 Take the **Stark Future phone** out of the **docking station**.
- 4 Spray the Stark VARG with cold tap water to remove coarse dirt.

## NOTICE

Do not use a high pressure cleaner. Water coming from a high-pressure hose can cause damage to the bearings of your motorcycle. Water can also get into the electrical wiring, which can lead to short-circuits in the electrical system.

- 5 Apply a wet sponge with neutral non-aggressive cleansing agent to the bodywork, when necessary.
- 6 Use a clean cloth with degreaser to clean the chain. Use the cloth to clean between chainrings, cogs and other hard-to-reach parts. If necessary, use a brush to get into the hard-to-reach parts.
- 7 Wash off each **wheel** with a brush moistened in water and neutral non-aggressive cleansing agent, when necessary.
- 8 Clean the area around the valve, scrub all the way around the **wheel** and clean the spokes and the wheel hub
- 9 Rinse the Stark VARG thoroughly with a gentle stream of tap water.
- 10 Let the Stark VARG air-dry in the sun or gently wipe it dry with a clean cloth.
- 11 Make sure the **drive chain** is completely dry and lubricate it, see [§Lubricating the chain](#).

## 6.3 LUBRICATING THE CHAIN

### Required supplies:

- Clean cloths
- Chain lubricant

### To lubricate the chain of the Stark VARG:

- 1 Make sure the motorcycle is standing upright and stable, with the rear wheel lifted off the ground.
- 2 Make sure that the motorcycle is clean and that the drive chain is degreased. See [§Cleaning the Stark VARG after use](#).
- 3 Spin the rear wheel with one hand while spraying lubricant on the drive chain with the other hand. Make sure the chain makes one full revolution.

### WARNING

Make sure the motorcycle is turned off. Only move the chain by turning the rear wheel by hand. Moving the chain by using the throttle may cause fingers or other body parts to get caught on the chain, causing injuries.

- 4 Take a clean cloth and wipe off excess lubricant.

## NOTICE

The chain does not need to be soaked in lubricant. This will only attract dirt.

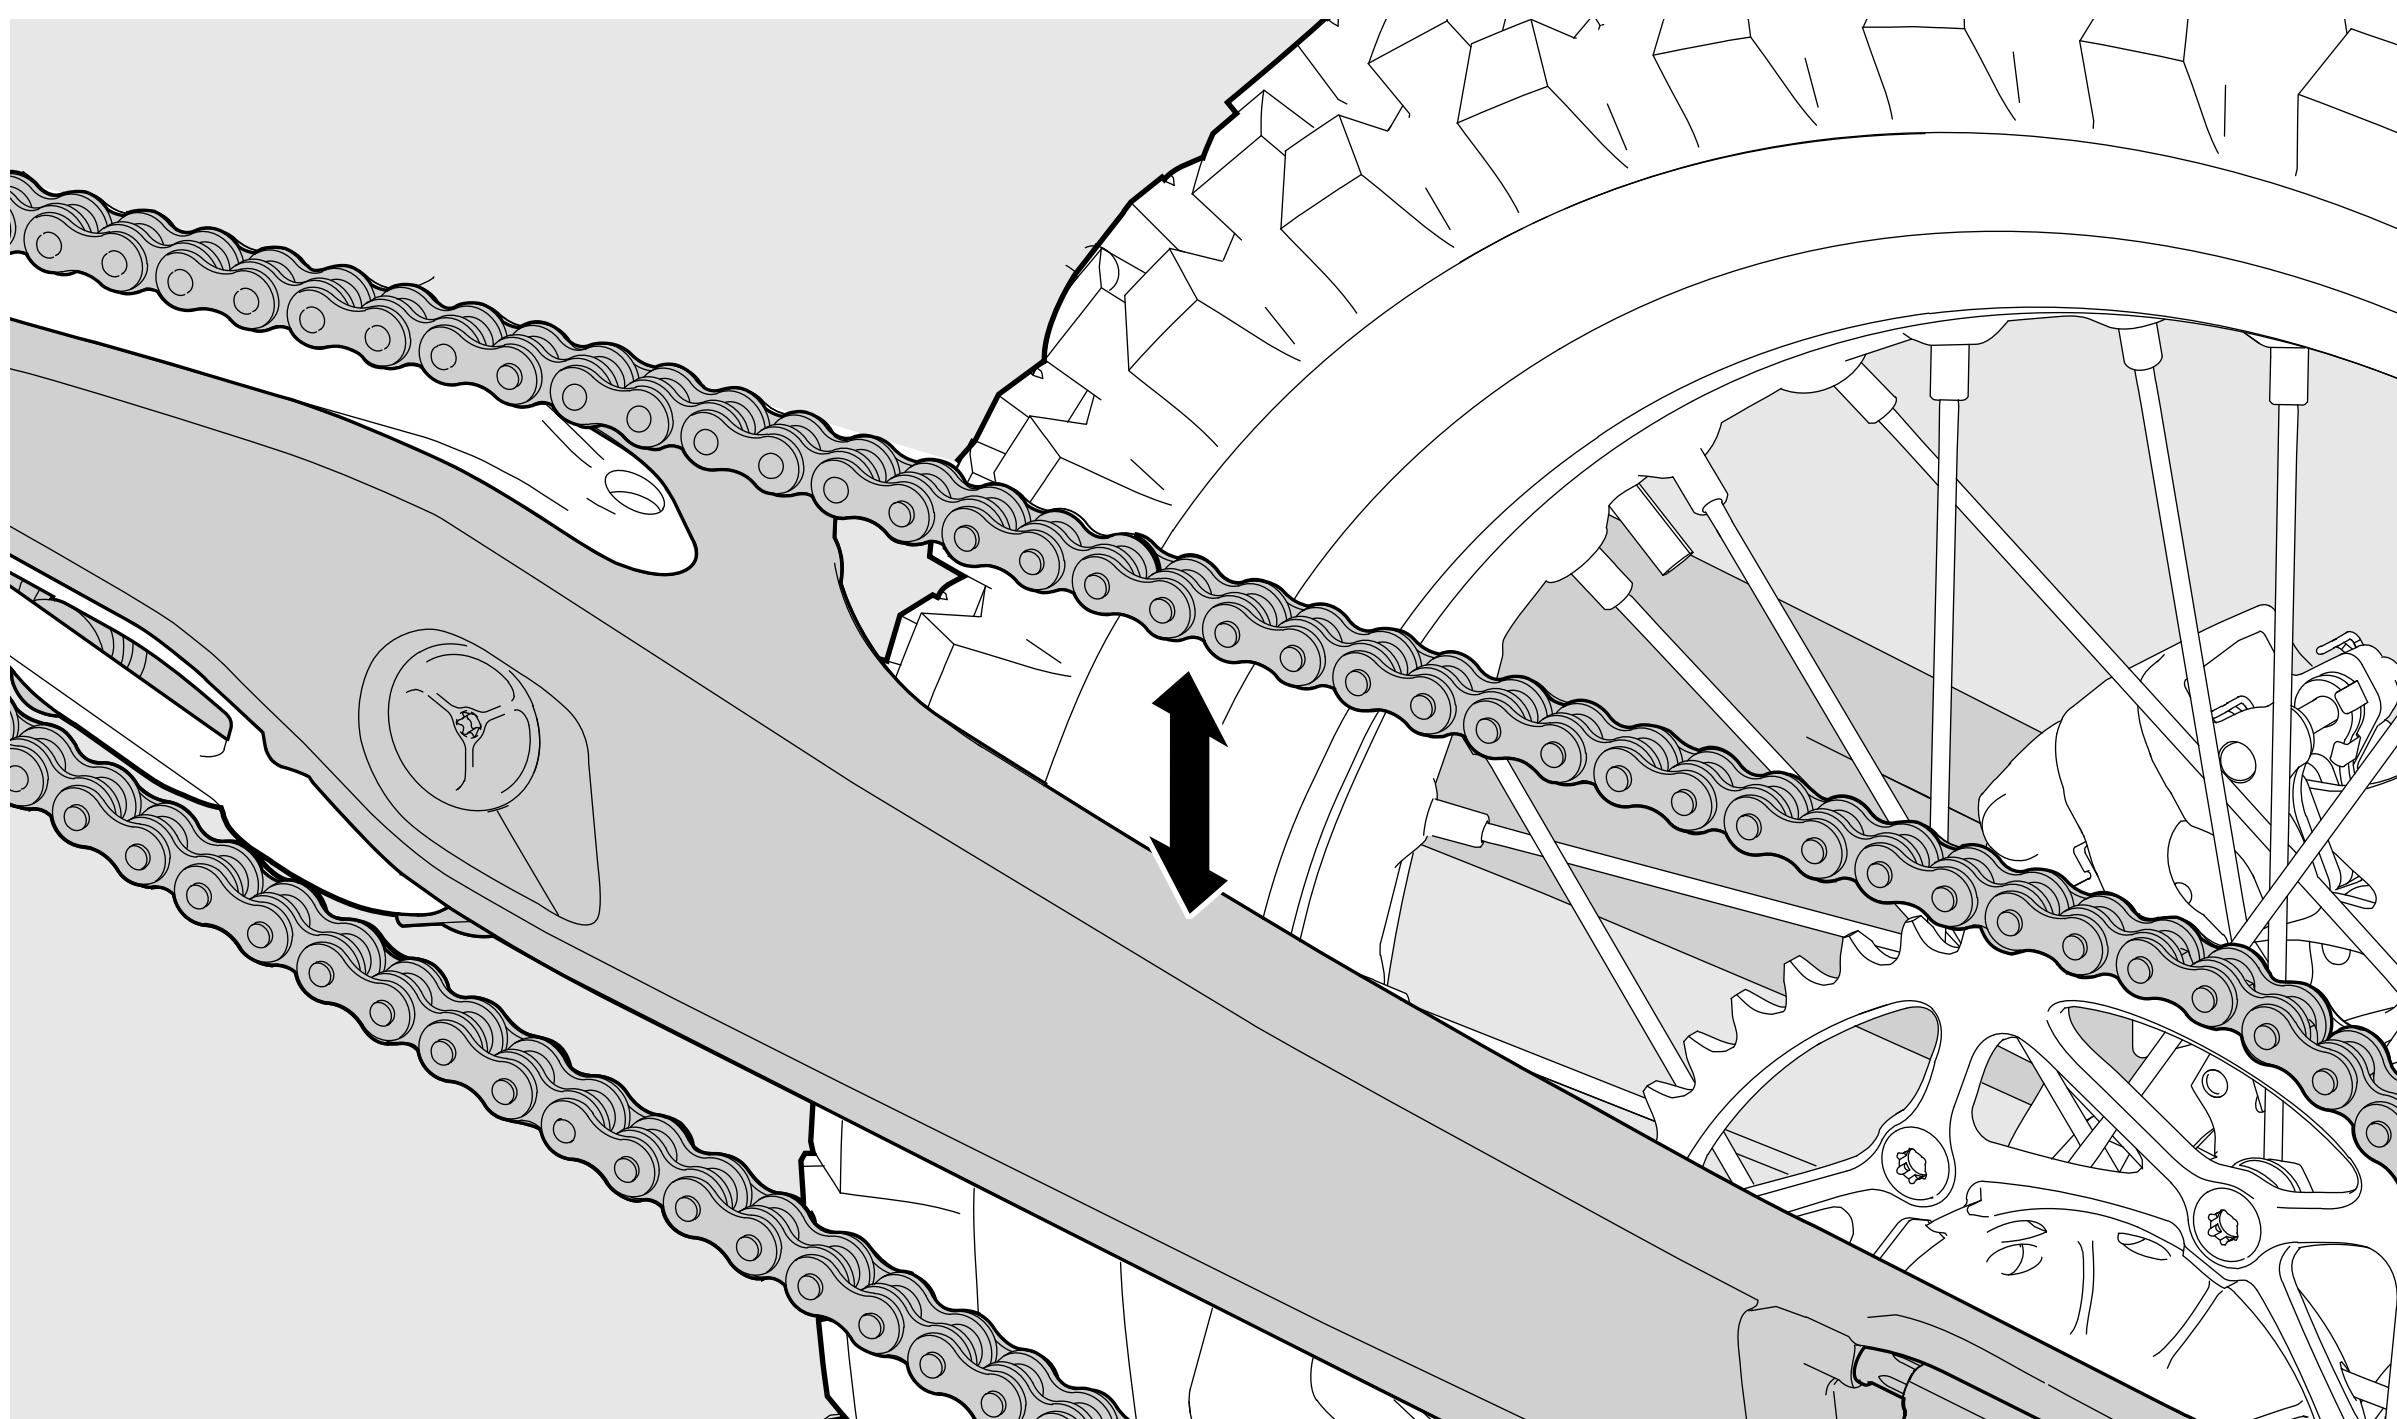

## 6.4 ADJUSTING THE CHAIN TENSION

### Required tools:

- Multiple tools which can be found in the included toolbox.

### To adjust the chain tension of the Stark VARG:

- 1 Make sure the motorcycle is standing upright and stable, with the **rear wheel** lifted off the ground.
- 2 Loosen the rear wheel axle lock nut.
- 3 Use a suitable **torque wrench** from the toolbox to turn the **adjuster screw** of the **rear-clicker** on the side of the **rear wheel** where the **drive chain** is located. Turn it clockwise to put tension on the chain and counterclockwise to release tension on the chain.

## NOTICE

The rear-clicker makes a clicking sound on every 90 degree rotation. This makes adjusting the other side of the wheel easier, by adjusting the rear-clicker with the same amount of clicks.

- 4 Adjust the **rear-clicker** on the other side of the **rear wheel** with the same amount of clicks.
- 5 Insert a rag between the chain and the rear wheel sprocket and spin the wheel slightly backwards.
- 6 Tighten the **rear wheel axle** lock nut to 80 Nm.

## NOTICE

See §Torque setting table.

- 7 Measure if the chain slack is around 25–32 mm (1 – 1.25 inches) at the end of the **chain guide**.

## NOTICE

The common practice to see if it is correct is to put 3 fingers between the chain and the swingarm, right at the end of the chain guide. The chain and swingarm should be pressing on your fingers.

## CAUTION

Make sure the motorcycle is turned off. Only move the chain by turning the rear wheel by hand. Moving the chain by using the throttle may cause fingers or other body parts to get caught on the chain, causing injuries.

## 6.5 ADJUSTING THE BRAKES

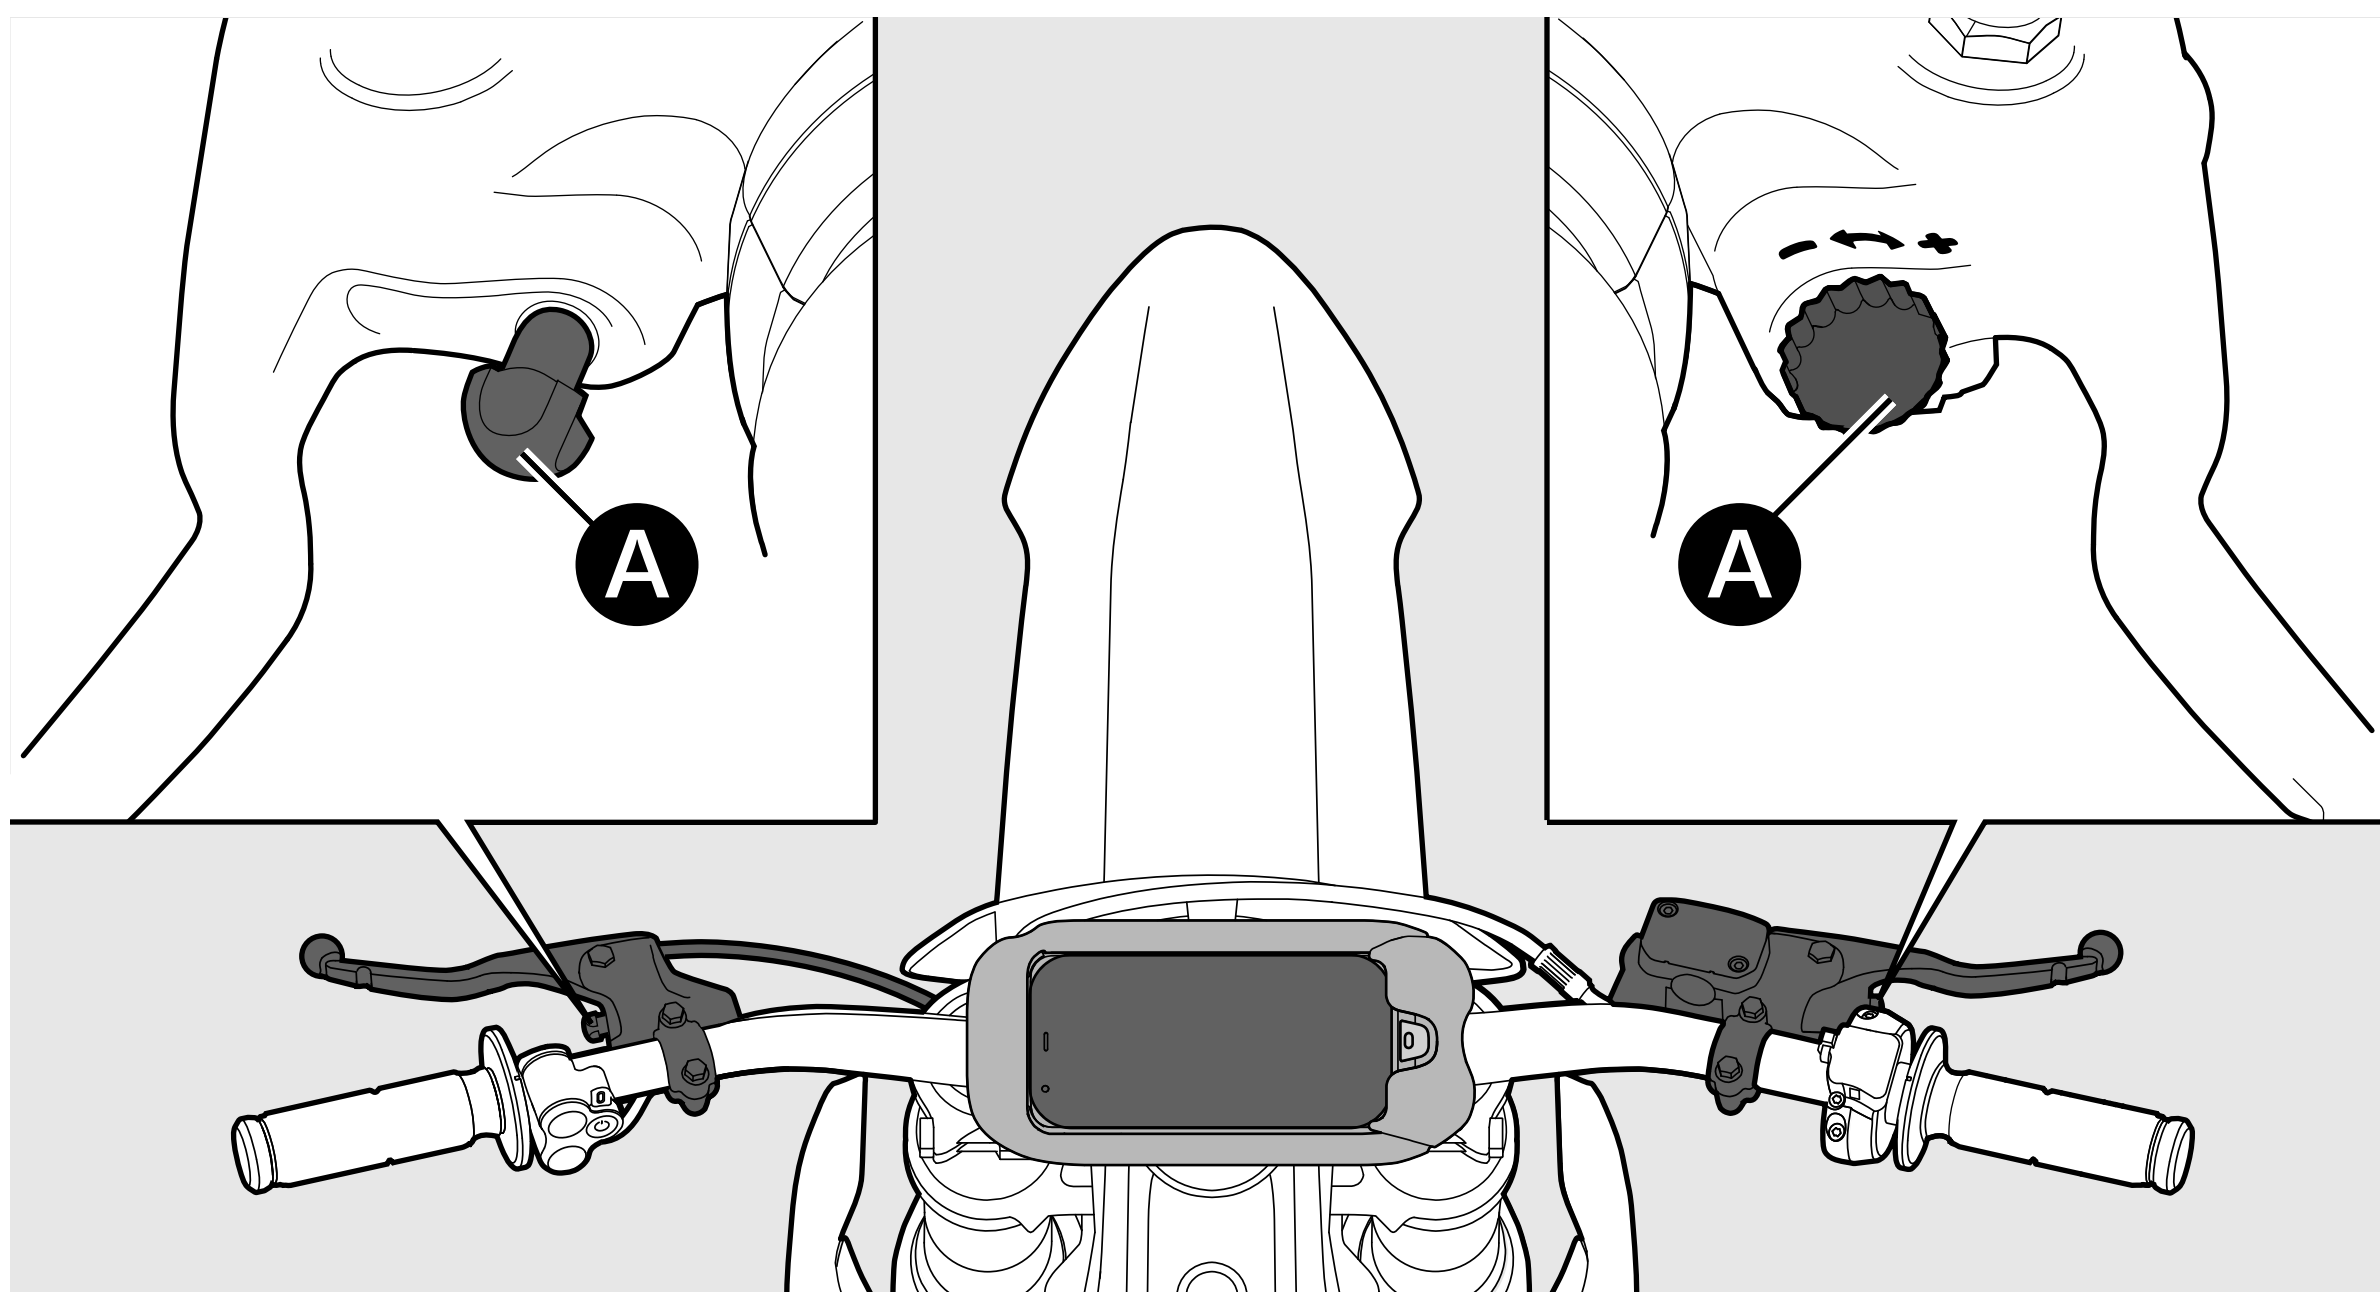

### DANGER

- **Risk of injury!** Beware of falling over the handlebar when only using the front brake. Front and rear brakes must always be used simultaneously.
- Beware of increased braking distances in wet weather.

To adjust the hand brakes on the Stark VARG:

- 1 Turn the adjuster **A** clockwise to increase the brake lever gap to the handlebar.
- 2 Turn the adjuster **A** counterclockwise to reduce the brake lever gap to the handlebar.

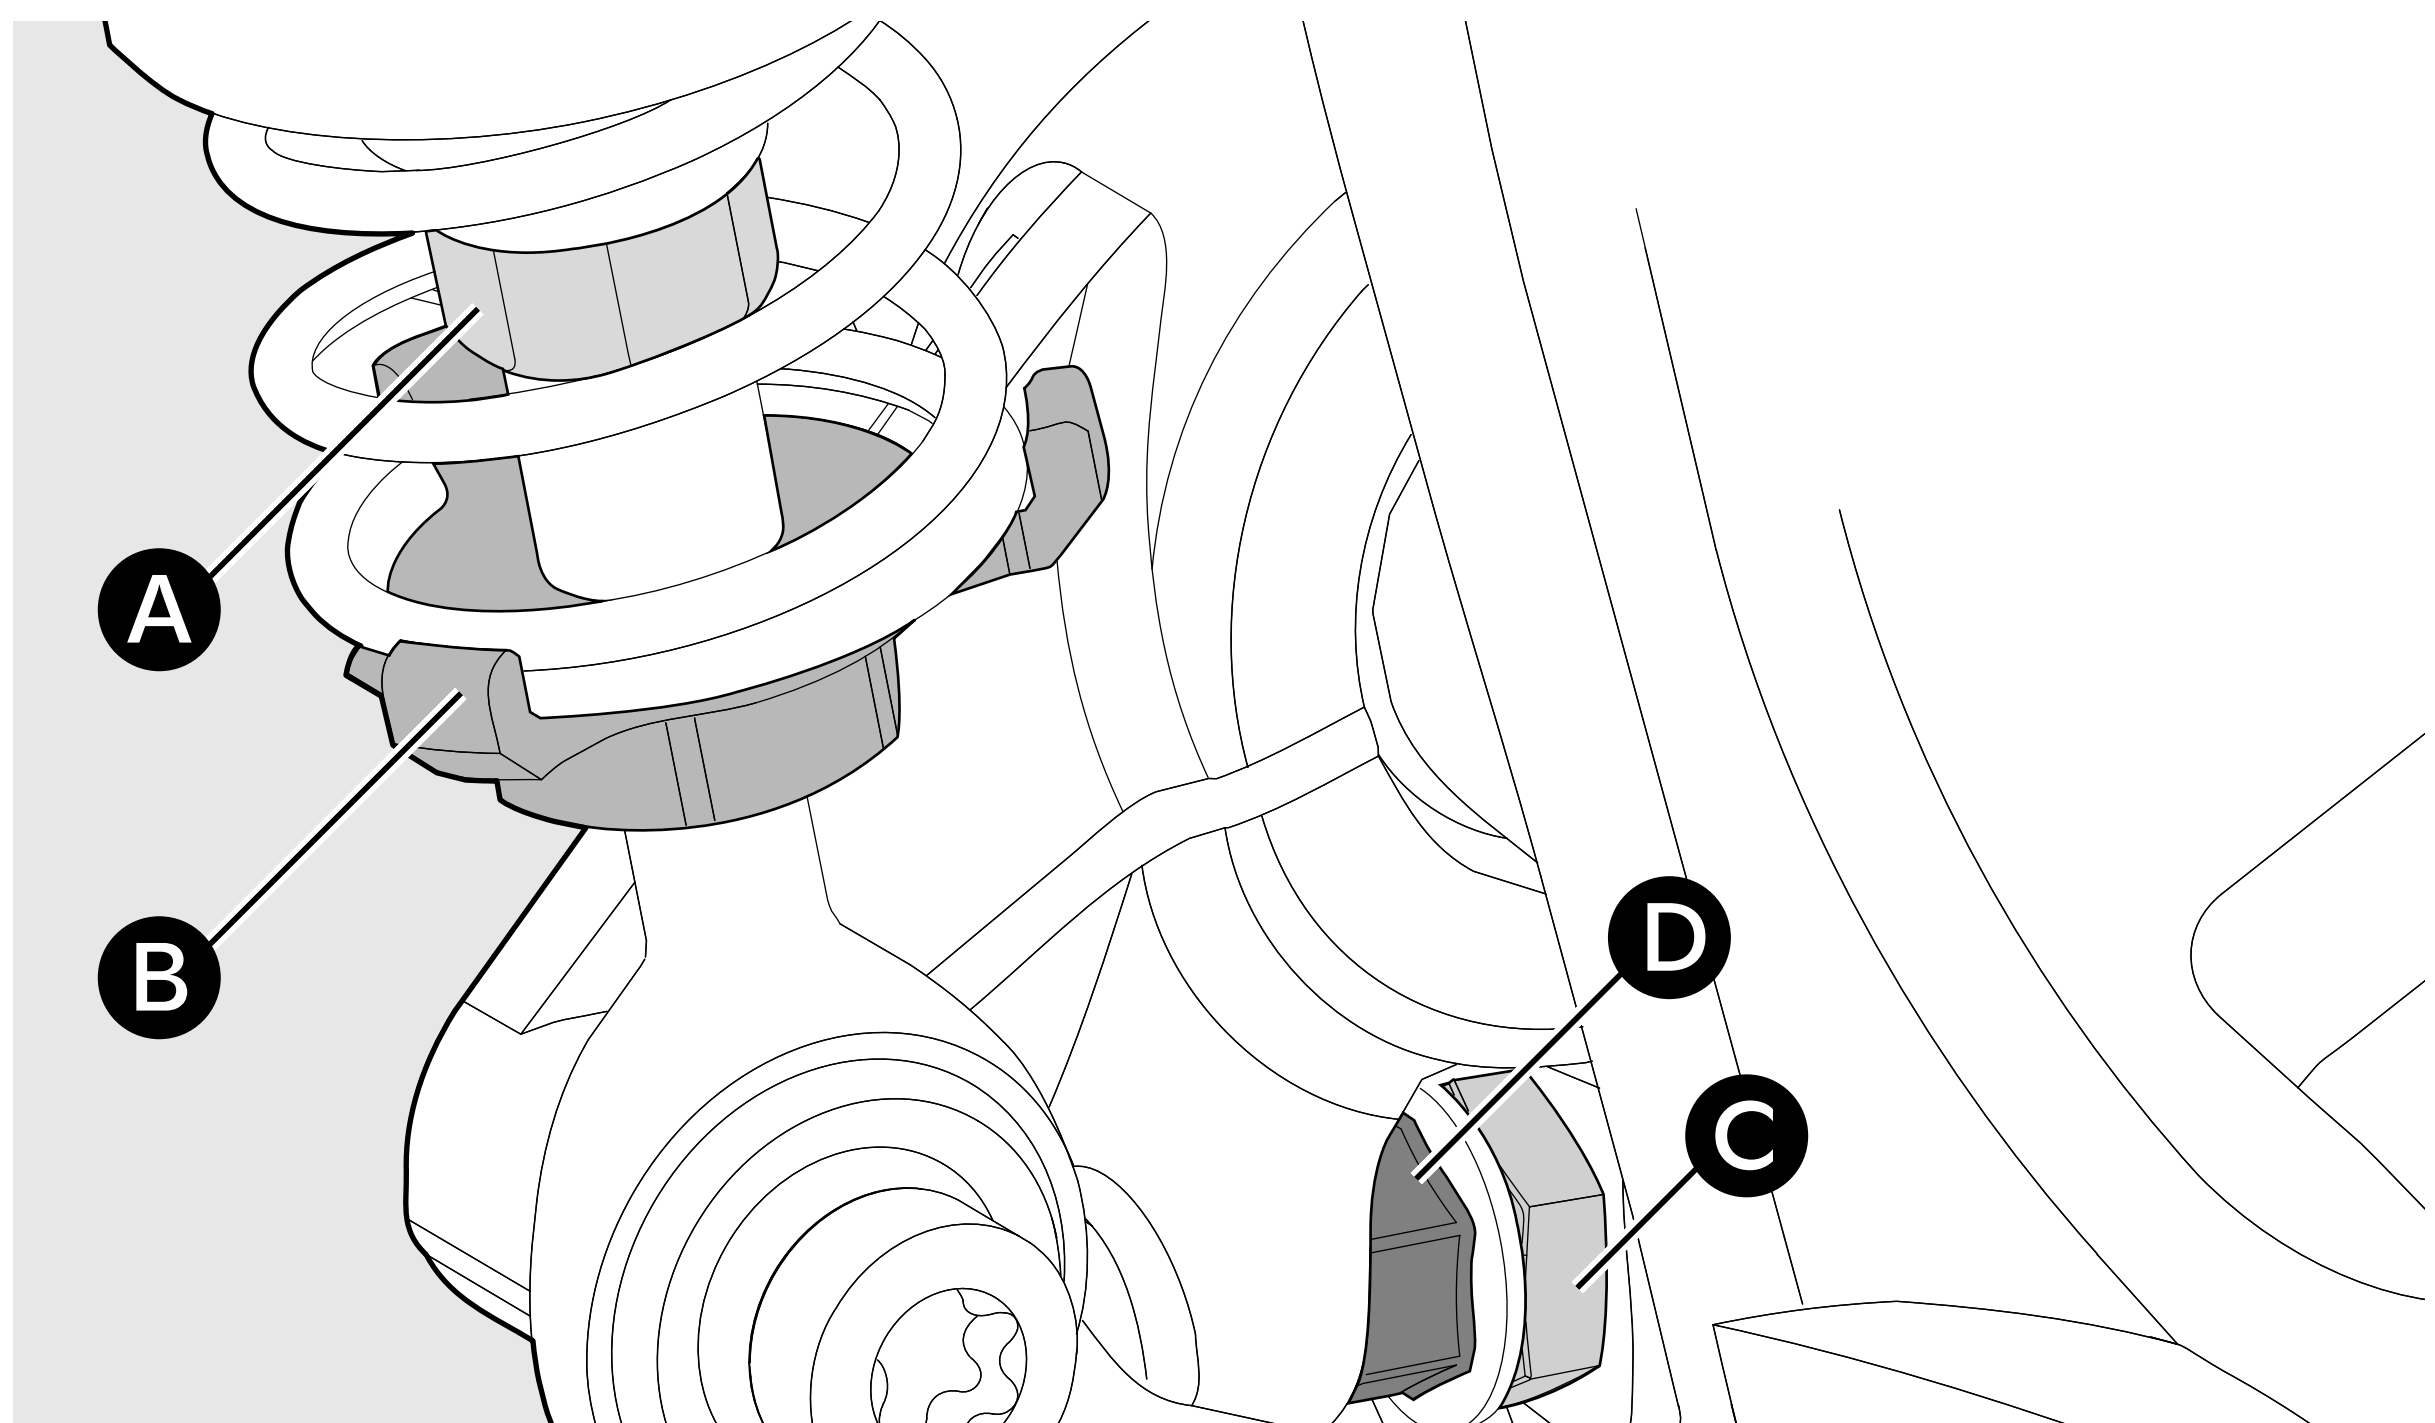

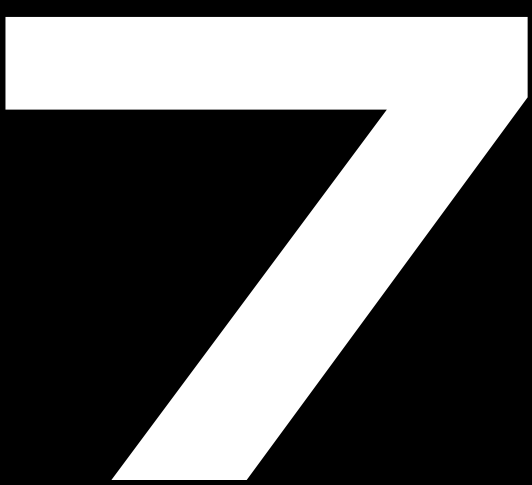

## To adjust the foot brake position on the Stark VARG:

- 1 Loosen the 10 mm locking nut **A**.
- 2 Turn the adjuster bolt **B** to move the pedal up or down.

## To adjust the foot brake play on the Stark VARG:

- 1 Loosen the 10 mm locking nut **C**.
- 2 Turn the adjuster bolt **D** to adjust the brake play.

---

**TRANSPORT  
AND STORAGE**

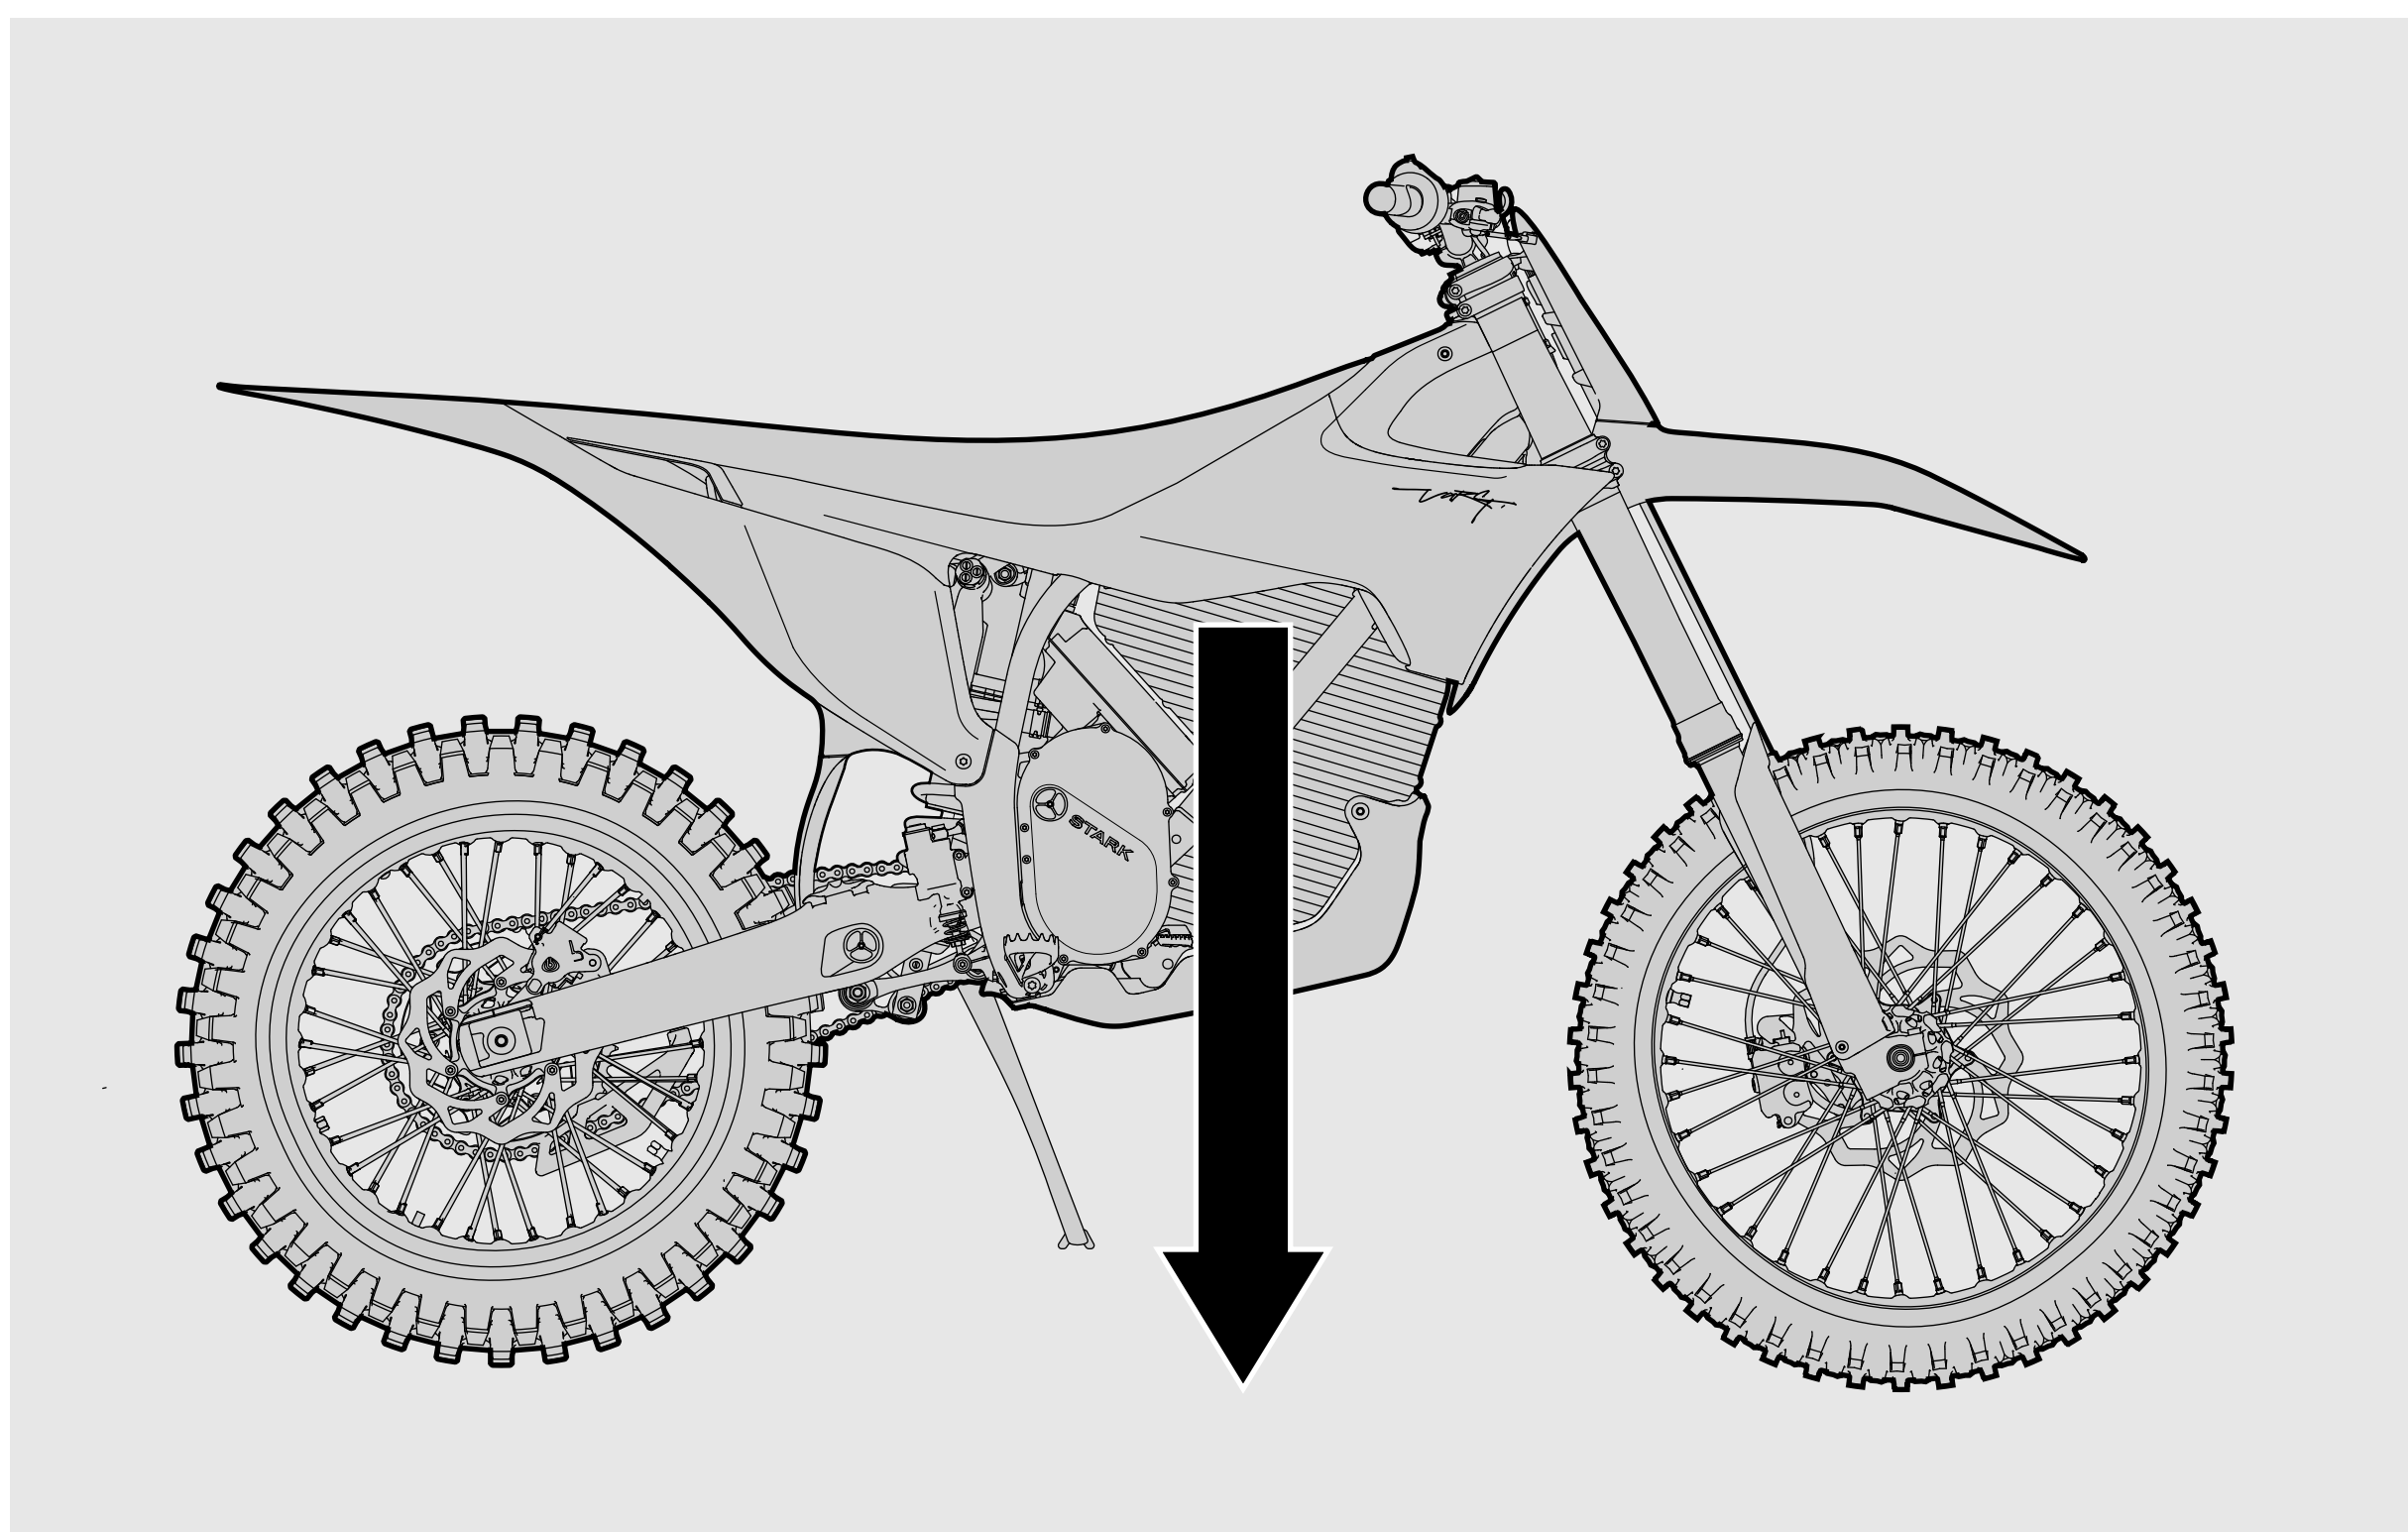

## 7.1 CENTRE OF GRAVITY

### CAUTION

**Risk of tilting!** Always make sure the motorcycle is stable, while performing any transporting tasks.

The motorcycle's center of gravity is indicated with a downward pointing arrow in the image below.

## 7.2 HANDLING AND TRANSPORTING THE STARK VARG

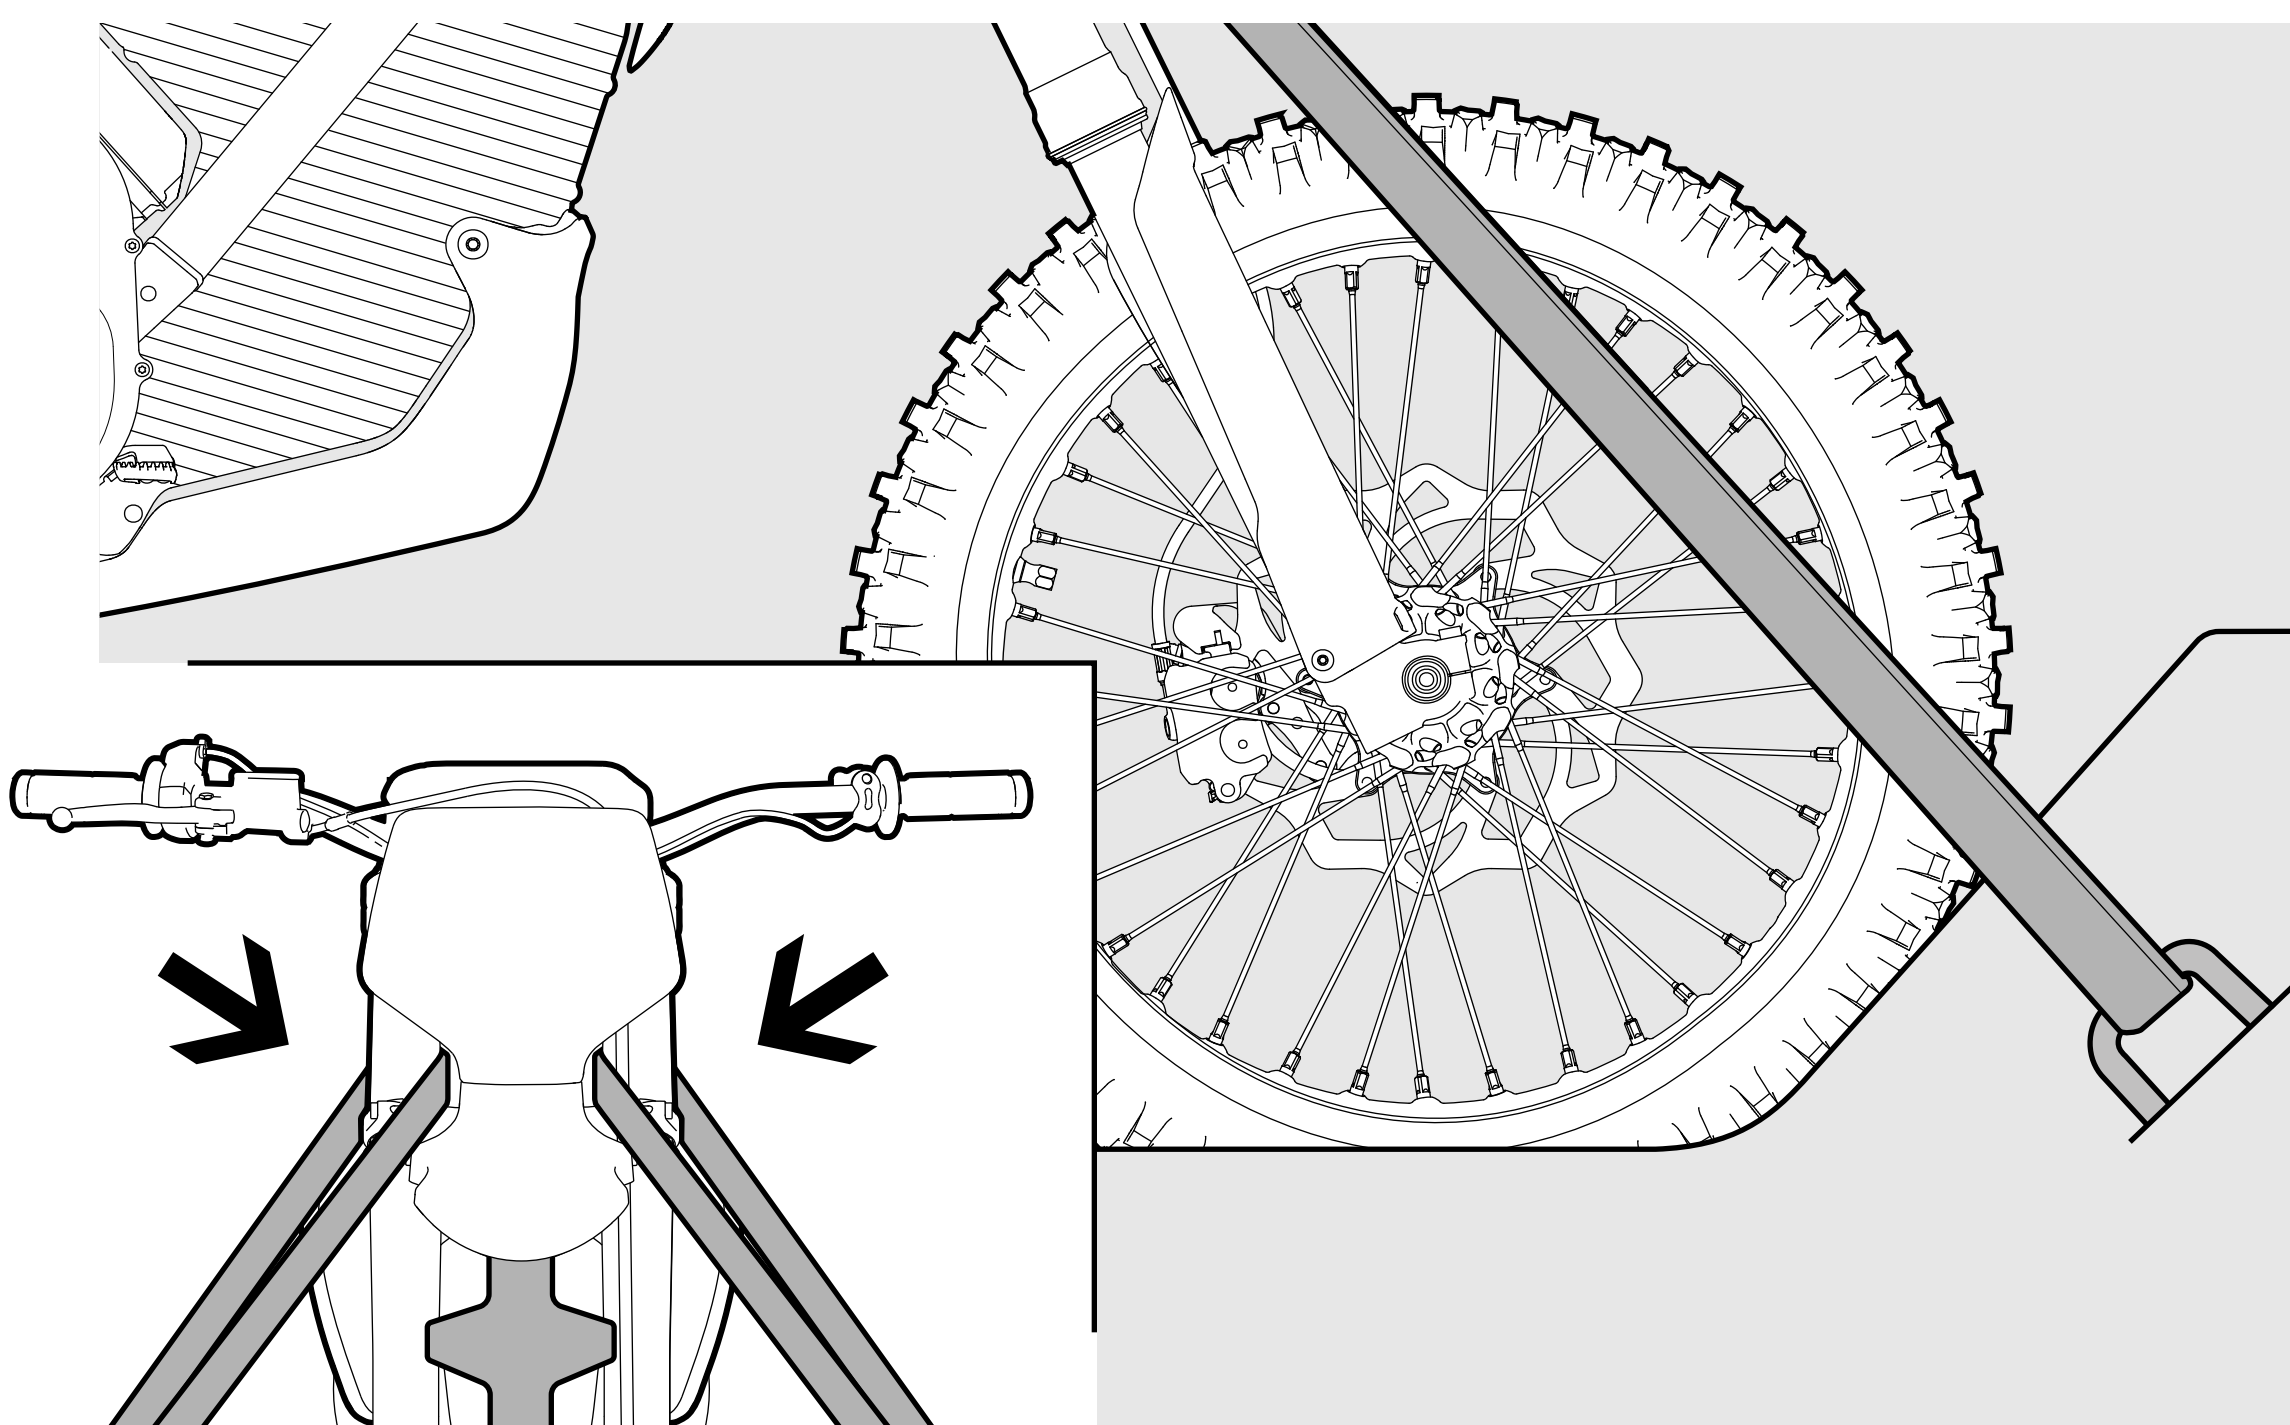

### CAUTION

Never use any lifting tools to lift the motorcycle. Only move the Stark VARG around on its two wheels.

To handle and transport the Stark VARG:

- 1 Move the motorcycle onto a horizontal **trailer** with sufficient capacity and the ability to stabilize both wheels and/or the frame.
- 2 Attach the frame of the motorcycle with one clamping strap on each side to the trailer to secure it against shocks.

- 3 Make sure the clamping straps are tightened properly and there is no possibility of sudden movements and or instability.
- 4 Make sure to observe the weight distribution in accordance with the trailer specifications.

## 7.3 STORING THE STARK VARG

### DANGER

- **Risk of injury or death!** Do not use the product if the battery pack is damaged. When the battery pack is damaged, it may present a fire hazard.
- **Risk of explosion!** The battery and the charger must be dry before operation. Dry the battery and the charger with a soft cloth.
- **Risk of explosion!** Do not charge or use a battery that is damaged. If the battery is damaged, it must be discarded immediately.
- **Risk of damage!** After charging, the charger must be disconnected from the battery and the AC power socket immediately.
- Always charge and store the battery in a dry environment.

## DANGER

- Do not charge a battery at temperatures below 4°C (40°F).
- Do not charge a battery that has been exposed to seawater.
- Do not charge the battery with charger cables that may be damaged.
- Do not charge the battery near flammable materials.
- Do not leave the battery unattended while charging.
- If the product appears to be bulging or shows other undesirable phenomena (e.g. excess noise), stop using the product immediately.
- Do not cover the product while charging the battery.  
Charge the product in a well-ventilated environment.
- Batteries produce heat when charging and discharging. If the product becomes too hot to touch, switch the product off and unplug immediately.
- If the battery leaks avoid contact with skin and eyes. Rinse affected areas immediately with plenty of clean water, then consult a doctor.

## To store the Stark VARG:

There are a few main things to consider when storing the bike for a longer period of time:

- Make sure the storage temperature is between 0 and 30 °C, with a preferred storage temperature of 10 °C.
- Make sure the motorcycle is clean, see [§Cleaning the Stark VARG after use](#)
- Make sure that the battery charge is between 30% and 50%.
- Check the charge of the battery regularly. If the charge drops below 30%, recharge the battery to 50%.
- Store the bike in a dry area free from frost.

- 1 Discharge the battery to 30%.
- 2 Recharge it to 50% to balance the cells.
- 3 Disconnect the charger.

### NOTICE

Monitor battery status every two weeks. Do not let the battery discharge completely.

DISPOSAL

## **9.1 HOW TO RECYCLE PARTS**

---

At the end of the technical lifespan, specific parts can be used again in a second life cycle. Old or worn parts have to be disposed of in the most environmentally friendly way, for example by bringing them to an acknowledged recycling center.

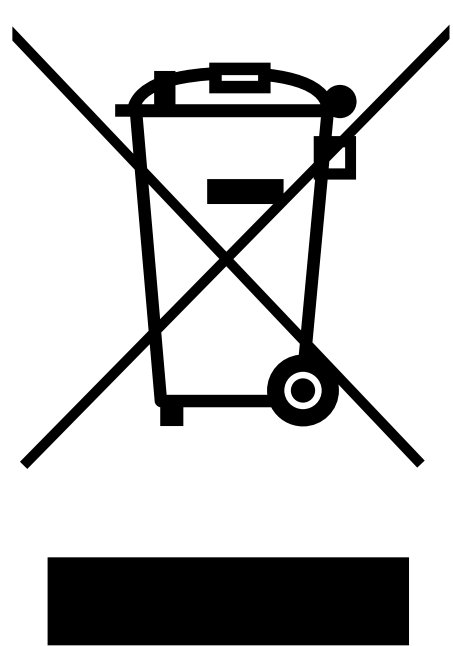

## **9.2 HOW TO DISPOSE OF HARMFUL SUBSTANCES**

---

Familiarize yourself with the national and local regulations with respect to environmentally friendly disposal of harmful substances such as oil and lubrication agents, parts and materials. If certain chemicals have been used for cleaning, you have to dispose of these in an environmentally friendly way. Also think of cloths and such that have become filthy with lubrication agents or oil. Consult the instructions for the chemicals for more information.

9.3

HOW TO DISPOSE  
OF ELECTRONIC  
COMPONENTS

The Waste Electrical and Electronic Equipment (WEEE) Directive aims to minimize the impact of electrical and electronic goods on the environment, by increasing re-use and recycling and by reducing the amount of WEEE going to landfill. The symbol on the product, the accessories or packaging indicates that this device must not be treated as unsorted municipal waste, but must be collected separately! Dispose of the device via a collection point for the recycling of waste electrical and electronic equipment if you live within the EU and in other European countries that operate separate collection systems for waste electrical and electronic equipment. By disposing of the device in the proper manner, you help to avoid possible hazards for the environment and public health that could otherwise be caused by improper treatment of waste equipment. The recycling of materials contributes to the conservation of natural resources.

## **9.4 HOW TO DISPOSE OF PACKAGING WASTE**

---

The packaging is made of environmentally friendly materials, which may be disposed through your local recycling facilities. By disposing of the packaging and packaging waste in the proper manner, you help to avoid possible hazards for the environment and public health. The symbol on the packaging indicates that the packaging is made of PAP.

## **9.5 HOW TO DISPOSE OF BATTERIES**

---

The product contains a battery. Batteries may not be disposed of with the usual domestic waste. They may contain toxic heavy metals and are subject to hazard our waste regulations. For this reason, dispose of used rechargeable batteries at a local collection point.

Stark Future will be liable for any defects arising in the Products within two years from the date of delivery to the acquiring end-user, except otherwise specified in local regulations that may apply to you. The use of Spare Parts for warranty claims shall not extend the original warranty period, except otherwise specified by applicable Law.

The legal warranty may imply that, if necessary, the product is repaired by Stark Future, replaced by another of similar characteristics or even returned to you. In any event, depending on the applicable local legislation and the specific circumstances of the faulty Product, the specific conditions may vary.

Stark Future reserves the right to decide whether to repair or replace and to use a new, reconditioned or remanufactured part in the warranty repair process, as long as the Motorcycle conforms to the warranty. Failures caused directly by lack of maintenance or improper maintenance will void the warranty. In particular, failure to strictly comply with the Maintenance Schedule contained in this Manual will void the warranty.
