Warranty Description

Dear customer, hello!

I am grateful for your patronage of our products, in order to ensure that your interests, please read the instructions and the following content carefully after you buy this product: (The following circumstances do not belong to the scope of the warranty, the company can provide paid services, please note)
1, not in accordance with the instructions for operation, use, storage, resulting in this product failure and damage.
2, unauthorised graffiti, tearing the product packaging and barcode.
3, unauthorised changes to the factory settings and dismantle the machine for repair.
4, accidental factors or human-induced damage to the product, such as the input of unqualified voltage, high temperature, water, damage, serious oxidation or rust of the product.
5, due to irresistible, such as earthquakes, fires, floods, lightning strikes and other causes of failure and damage.

FCC STATEMENT

1. This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
2. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
Reorient or relocate the receiving antenna.
Increase the separation between the equipment and receiver.
Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
