Q&A

1. The watch cannot start

Please hold down the power button for more than 6 seconds or the battery may be low. Please charge it in time.

2. Bluetooth is not connected or cannot be connected

- 1) Please try to restart the watch and re-link.
- 2) Please try to restart Bluetooth and connect again.
- 3) Don't connect your phone to other Bluetooth devices at the same time.

3. Watch measuring heart rate/blood pressure/blood oxygen/error

- 1) Generally for measurement, the watch sensor and the human body is caused by poor contact.
- 2) Please pay attention to full contact between the sensor and the wrist during measurement.
- 3) For people with darker skin color and hairy arms, please enable enhanced measurement in App[Device > Enhanced measurement].

4. Sleep data is not accurate enough

- 1) Sleep monitoring simulates people's self-perceived state of falling asleep and waking up, which needs to be worn correctly.
- 2) If you wear it too late or when you fall asleep, errors may occur.
- 3) Sleep data is not monitored during the day, and the default sleep monitoring is from 9:30 PM to 12:00 noon the next day.

For more frequently asked questions, please check the App[My >FAQ]

Bluetooth data transmission

When connected to a mobile phone, the watch synchronizes some data, including weather, notifications, sports and health data, with the phone via Bluetooth. When the connection is disconnected or Bluetooth is turned off, the data will not be synchronized.

Note:

- 1) Do not charge in a humid environment with water
- 2) please regularly use a clean flannelette to clean the magnetic suction charging hole on the back of the watch, to ensure that the magnetic suction charging hole and magnetic charger fit, to ensure normal charging
- 3) This product is not equipped with a power adapter, in order to ensure the safety of family and property, when charging, you can use the computer USB interface or choose a power adapter whose output is not more than 5V 1A.

Please buy the power adapter through the regular channel, and avoid using the bottom quality and fake power adapter to avoid bursting or fire.

Matters needing attention

1. The measurement results of this product are only for industrial examination and are not used as any medical use or basis. Please follow the doctor's guidance and do not use the measurement results for self-diagnosis and treatment.

2, this product waterproof grade is IP67, can not be used for deep diving and long time in the water.

In addition, this product does not put hot water, because the steam will affect the watch.

3. The Company reserves the right to modify the contents of this manual without prior notice.

Some functions are different in the corresponding software version. This is normal.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
