USER DOCUMENTATION

ANC

Bluetooth LED flashing

Power on	Red and blue lights flash slowly
Shutdown	Red light flashes for 3 seconds, turn off the light and shut down
Pairing in progress	Red and blue flashing
Connection successful	Connected blue light flashing slowly
Music playback	
Music pause	
Incoming call	
During the call	
Low battery	
Charging	The red light is always on
Fully charged	The blue light is constantly on

Bluetooth mode current

Is the charging turned off	Shutdown	Call power consumption	Reference power consumption: 20mA (dual load 32 Ω)
Power on current	8mA	standby power	0.5-3mA
Charging Voltage	5V	Power consumption during shutdown	2uA
Charging current	Default 200mA	Low power shutdown voltage	3.1V
Power consumption for playing music	Reference power consumption: 15-35mA (dual load 32 Ω)	Search for current	4.01mA-5.95mA
		Low power prompt voltage	3.3V

Prompt sound

Describe	English pronunciation
Power on	Dower on
Shutdown	Dower off
Pairing in progress	Not have
Connection successful	Connected
Disconnect	Disconnected
maximum volume	English pronunciation
Min Volume	DiDi Yin
Ring tone	Ring tone
Call number reporting	Ringtone after reporting the number
Low battery warning	English pronunciation

Introduction to the appearance, wireframe, and functions of headphones

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This device and its antenna(s) must not be co-located or operation in conjunction with any other antenna or transmitter.

Radiation Exposure Statement
The device has been evaluated to meet general RF exposure requirement in portable exposure condition without restriction.
