

MINI PORTABLE CHARGER

5000mAh

15W

Thank you for choosing our powerbank.
Please kindly read this user manual carefully before using and keep it for future reference.

Product parameters

Brand : DILIBIRD
Model : F16
Battery type: Lithium-ion battery
Battery Capacity : 5000mAh
Product size : 3.5"x1.53"x1"
Input : Type-C port : 5V=2.0A(Max)
Output : Type-C cable : 5V=3.0A
Wireless Output : 3W Max
Type-C port : 5V=2.0A(Max)

Package Contents

1 x F16 Portable Charger
1 x Type-C-USB Charging Cable
1 x User Guide

Charging: Type-C interface supports 5V/3A fast charging mode

Safety: The F16 power bank is equipped with multiple protection designs to easily handle various abnormal situations such as overcharging, over-discharging, high temperature, and short circuit, providing reliable protection for both the power bank and digital devices.

Notes

- * Please read the attached instruction manual carefully to learn how to use this product properly.
- * Avoid using this product in high temperatures or short circuit environments, and do not drop or damage the product.
- * Please keep the product in a safe place out of reach of children.
- * For safety reasons, please do not disassemble this product yourself, as disassembly may lead to safety risks.
- * If you find the battery is bulging, deformed or exposed to water, please stop using it immediately.

DILIBIRD®

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation. Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
