F53 Manual

10000mAh

Thank you for purchasing this product. Please read and keep the manual carefully before using this product for reference.

**Specifications**

Model: F53  
Battery: Li-Polymer Battery  
Capacity: 38.5Wh (10000mAh/3.85V)  
Input: (Type-C Port)5V/3A,9V/2A  
Output: (Type-C Port)5V/3A,9V/2.22A,12V/1.67A  
Wireless charging Output: 5W, 7.5W, 10W, 15W (Max)  
Total Output: 5V/3A (15W Max)  
Size: 69.7 \*110.4 \* 18.7 mm

In/Output Simultaneously

Multiport Output

**Instructions for use**

Button use prompt: Click the button in shutdown state to open the output, and the screen will light up.At the same time, the wireless charging mode is turned on, and the screen is closed after 12 seconds if it is not charged.And stop the wireless charging mode. Double click the button to turn off the mobile power completely.

Charge the mobile power supply: Connect the charging cable of the charger to the Type-C of the mobile power supply.Input port, the screen displays the input mode, start charging.

**Wireless charging mobile phone:**

1. Use wireless charging to connect your phone or device.

**Simultaneous input/Output of multiple devices:**

It can be charged and discharged simultaneously. The Type-C port charges the power bank itself, wireless charging to charge the device.

**Attention**

- To maximize battery life span,fully charge power bank for 3.5 hours before first use.
- Store power bank in a cool and dry place.
- Do not store power bank in hot or humid environment.
- Operating temperature should be between 10 to 45°C.
- Charge and discharge at least once every three months.
- When charging a device,the power bank may feel warm,this is a normal operating temperature and should not be cause for concern.
- In normal conditions,the battery performance will declines lightly over several years.
- Danger of explosion if battery is incorrectly replaced.Replace only with the same or equivalent type.
- No naked flame sources,such as lighted candles,should be placed on and near the apparatus.
- Batteries (battery pack or batteries installed)shall not be exposed to excessive heat such as sunshine,fire of the like.
- Do not short circuit.
- Do not incinerate.
- Do not disassemble.

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation.

This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment.

The FCC certification of this device refers to RF exposure testing performed in typical operating conditions, where a person is no closer than 0 centimeters from the device surface at all times, except for non-repetitive patterns with transient time intervals in the order of a second. Only in the stated conditions, the device is shown to fully comply with the FCC RF Exposure requirements of KDB 447498.
