OPERATING INSTRUCTIONS

Motorcycle smart screen **Manual**

FCC warning：

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
-- Reorient or relocate the receiving antenna.
-- Increase the separation between the equipment and receiver.
-- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
-- Consult the dealer or an experienced radio/TV technician for help.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

*RF warning for Mobile device:
This equipment complies with FCC radiation exposure limits set forth for an
uncontrolled environment. This equipment should be installed and o perated with
minimum distance 20cm between the radiator & your body.

12、Power on startup password

The default power an password is 0000,and you can enter the power on password setting by yourself through the "Settings"function item.

Common fault handling

1.The device cannot be turned on after the vehicle's ACC power is turned on.

Please check if the line connection is normal.

2.The front or rear camera does not display.

The camera needs to be checked.If the front camera does not display,it will change to a rear camera after replacing the camera.If the rear camera does not display,it is a problem with the camera itself.Please replace it with a new camera.

3.Both the front and rear cameras are not displayed.

Check if the camera cable connection is normal.

4.The recording is not clear.

Suggest checking the lens for dust and wiping it clean.

5.Bluetooth cannot connect.

Check if the Bluetooth password is correct when matching the host and phone.

6.Bluetooth earphones cannot be connected.

Check the compatibility between the host and Bluetooth earphones.If the host cannot find Bluetooth earphones and there is incompatibility,please connect or replace the earphones multiple times.

7.Unable to replay recorded videos or photos in the app.

Please check if the TF-SD card is damaged.

8.If there is electromagnetic interference from stripes on the screen display or recorded video.

Please check if there are any issues with the camera wiring and bundling.The wiring should be smooth,non fold able, and leave a certain margin.The bundling should not be too tight or the car shell should not be squeezed too tightly.
