Internal EUT Photo

Photo 1

Photo 2

The image shows the internal components of a smartphone. The back cover is removed, revealing the battery, motherboard, and various connectors. The battery is a large, rectangular unit with a label that includes safety warnings, a barcode, and technical specifications. The motherboard is blue and populated with various electronic components, including a large black chip, capacitors, and connectors. The phone is resting on a blue surface.

A photograph of a disassembled smartphone, showing the internal components including the battery, camera module, and various connectors, laid out on a blue surface. The components are arranged in a way that shows the layout of the phone's interior. The battery is a large, rectangular, blue component with a white label that reads "T88 8888 V2.0 44" and "DIP-SMARTPHONE". The camera module is a small, rectangular, silver component with a lens. Other components include various connectors, capacitors, and a small red cable. The components are laid out on a blue surface, which is a common background for such photographs.
