FAQ

Q Why does the music cuts in and out sometimes?

A 1-Please make sure there is no obstacle between the earphones and your device.
2-Please make sure there is no Microwave oven/WIFI transmitter around you, which is more likely to produce electromagnetic interference and result in signal interruption.

* Note: Please keep the device and the earphones as close as possible to ensure a more stable Bluetooth connection.

Q What should I do if the earphones stop charging?

A 1-We advise you to charge the earphones by using the supplied original charging cable.
2-Please make sure the charging pins and charging points are clean & dry before charging.
3-Please make sure the earphones battery is run out if sometimes it can't be charged properly.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC Radiation Exposure statement

The device has been evaluatec to meel general RF exposure requirement. The device can be used in portable exposure condition without restriction.
