VI. Main menu functions Introduction

1. Sports mode
The watch sports modes include outdoor running, outdoor walking, indoor running, cycling, basketball, football, table tennis, badminton, rope skipping, square dancing, boxing, yoga, and other modes: enter to set target time, target mileage, target calories and other sports data; click to start exercise, swipe right to exit the current sports mode

2. Phone
After pairing it with Bluetooth on the mobile phone, you can usually use this function to answer and make calls. Call interface:
· Click the call interface.
· Enter the corresponding number.
· Click the call icon to make a call.
Recent calls: click to view call records
Contacts: Click Contacts → Update → to synchronize the mobile phone phone book

3. Medication reminder

· Click "+" to add a fixed medication reminder. Users can set the reminder cycle by themselves: one month/one week, or an actual number of days. According to your medication plan, set the daily medication time on the operation panel of the smart device.
· The medicine box will remind you to take the medicine when you set it. When the reminder arrives, the intelligent medicine box will emit a sound and vibration reminder to ensure you will not miss the medication time.
· When the medication reminder vibrates or rings, if you do not open the medicine box to take the medicine, the watch interface will continue to display the medication reminder message until you open the medicine box. The reminder text will not disappear.
· Medication reminder record: click to view the most recent medication record.

4. Important reminders

· Click "+" to add important schedule reminders for users
· Important reminders display the phrase (Important matters).

FCC STATEMENT

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) This device may not cause harmful interference, and
(2) This device must accept any interference received, including interference that may cause undesired operation.
 This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
—Reorient or relocate the receiving antenna.
—Increase the separation between the equipment and receiver.
—Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
—Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modificationsto this device not explicitly approved by manufacturer could void your authority to operate this equipment.

FCC Radiation Exposure Statement:
This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. In order to avoid the possibility of exceeding the FCC radio frequency exposure limits, The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
