### Two strikes

Left ear (L) volume + (there is a "Deng Deng" prompt sound at maximum sound)

Right Ear (R) Volume-

### Three strikes

Left Ear (R) Next Song

Previous song in right ear (L)

Triple click switch between Chinese and English languages in pairing mode

### Five strikes

Restore to factory settings. Specific operation: When two earphones are paired, quickly tap five times and you will hear a "beep" sound to indicate that the factory settings have been successfully restored. After putting both earphones into the charging compartment and waiting for the earphone lights to display, take them out for 5 seconds. The two earphones will automatically pair into pairs and emit a pairing number "M-9S". Turn on the Bluetooth function on your phone and click on the new pairing number "M9s" to connect. If frequent operation causes system confusion, put the headphones back into the charging compartment and wait for two hours before proceeding with the above steps to restore factory settings.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures: – Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction
