• Apple Carplay

Wireless Carplay supported phone models that should be above IOS 9 and phone compatible with Carplay:

iPhone 14、iPhone 14 Plus、iPhone 14 Pro、iPhone 14 Pro-Max、iPhone 13 Pro、iPhone 13 Pro-Max、iPhone 13、iPhone 13 mini、iPhone 12 Pro、iPhone 12、iPhone 12 mini、iPhone 11 Pro、iPhone 11 Pro Max、iPhone 11、iPhone XS、iPhone XS-Max、iPhone XR、iPhone X、iPhone 8、iPhone 8 Plus、iPhone 7、iPhone 7 Plus、iPhone 6s、iPhone 6s-Plus、iPhone 6、iPhone 6Plus、iPhone SE、iPhone 5s、iPhone 5c、iPhone 5

Note: Currently, lower versions of the IOS system may not be able to use the Carplay application. If you encounter compatibility issues with your phone's Carplay, please try upgrading the IOS system.

How to set-up:

1. Click the CarPlay icon on the main menu of the car stereo.
2. Turn on the Bluetooth of the mobile phone first; Find the Bluetooth name "CarKit-xxxx" in the Bluetooth list, cilck to pair, (If need pin code, try 0000)
3. The pop-up "Allow Contacts and Favorites Sync" will pop up on your iPhone, please click "Allow".
4. The pop-up "Use Carplay with "IVT" will pop up on your iPhone, please click "Use Carplay", and then car stereo will automatically enter into carplay interface.

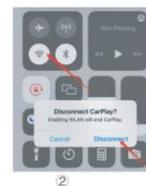

ADDITIONAL EXPLANATION

Working Principle:

- Wireless CarPlay uses Bluetooth to set up the connection between the phone and the vehicle for the actual functionality.

- When the car stereo is powered on, it will try to automatically connect to the last connected phone.

- Based on the working principle of the car player, please pay attention to the following:

1. The auto-connection function of the car stereo requires you to keep the Bluetooth of the mobile phone available.
2. Since the car stereo will disconnect the Bluetooth connection after pairing, your phone's Bluetooth may automatically connect to other devices, which may cause car stereo mic input or sound playing to be unavailable. You may need to manually disconnect your phone from the other Bluetooth or switch off the Bluetooth directly to fix it. (Bluetooth plays a pairing role in the work of the car player. But when you use it next time, you still need to turn on Bluetooth, so that the car stereo can be automatically paired and connected.)

Note: In the drop-down menu of the mobile phone, you need to click to turn off Bluetooth first, and the car player will keep trying to reconnect.

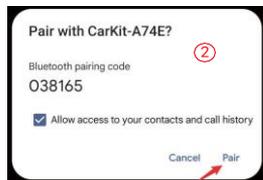

- **Android Auto**

Wireless Android Auto supported phone models which should support Google service:
1. Android 11.0 or above system version,
2. Google or Samsung phones with Android 10.0
3. Samsung Galaxy S8; Galaxy S8+; Note 8 with Android 9.0

Important Note: Open Android Phone Settings – Connection Settings, Check if Android Auto exists, or search for Android Auto on the Settings page. If there is an Android Auto option, it means that the protocol connection is supported. If not, try restarting your phone and logging back into the Google Play store to see if Android Auto can be found. If it still cannot be found or cannot be installed and used properly, it may be due to local policies/laws that do not support the application. Please ensure that your country or region supports Android Auto wireless services.

How to set-up:
1. Click the Android Auto icon on the main menu of the car stereo.
2. Turn on the Bluetooth of the mobile phone first; Pair new device and find the Bluetooth name "CarKit-xxxx" in the Bluetooth list, click to pair, (If need pin code, try 0000)
3. The pop up "Pair with Carkit-xxxx" will pop up on your phone, please click "Pair".
4. The pop up "Allow access to messages?" will pop up on your phone, please click "Allow"; and then car player will automatically enter into Android Auto interface. When the car player is powered on, it will try to automatically connect to the last connected phone.
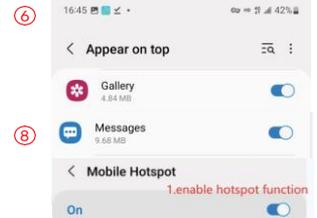

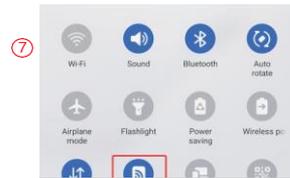

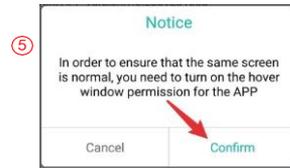

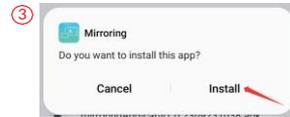

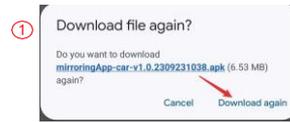

• **Android Mirror**

It can realize the mirror projection of the mobile phone and the car machine.
You need to scan the code with your Android mobile phone to download, install and run the "Mirroring" application.

1. Click the "PhoneLink" option in the Menu, and then click the "Mirror" option under Android.

2. Scan QR code and download APK.

3. Turn on hotspots on your phone, and name it to 'car' and set the password as 12345678

FAQ

Car stereo doesn't have sound
• Please check if you set the volume to zero, or mute the radio.

Wireless Android Auto function cannot be used
1. Please contact seller to update the device to newest version
2. Make sure your Android phone has downloaded the Mirroring app as mentioned.

I cannot see the Bluetooth of the device or I cannot connect to the Bluetooth successfully.
Please try to check if other phones have connected to the car stereo (or other phones are trying to auto-connect to this car stereo), if yes, this situation may happen. In this case, you need to disconnect the Bluetooth between other phones and this car stereo, and then try to connect with your desired phone.

Volume is not sufficient.
If you think built-in speaker isn't loud enough. Please use the AUX cable to connect to your car to transfer the sound to your car speaker; you can also use the to transmit sound from this portable car screen to your original car audio system.

Screen get stuck I cannot do anything or click on anything.
If the unit crashes and screen get stuck, please restart the unit by using a small needle to insert into the 'RESET' hole at the back of the unit.
Or you can simply cut off the power and turn on the unit to try again.

How to change the boot up logo

1. Prepare an empty TF card and create a folder named 'update' in the root directory.
2. Prepare your own car logo picture with a size of 1024 x 600 pixels, name it: stalogo.jpg, and put it in the update folder.
3. Insert the prepared TF card into the multimedia car player after the unit is powered on. It will automatically update the new boot logo.
4. Disconnect the power supply, and then connect the power supply again. The screen will display a new custom logo, indicating that the setting is successful.

The player cannot turn off by itself
Kindly note this is not the issue of the CarPlay screen. It has something related to your car. Some cars still provide power to the cigarette lighter after turning off the key. In this case, you may need to turn off the carplay screen manually or buy a 12V battery saver.
