- *Protocol: HFP, AVRCP, A2DP

Productions

Care and Cleaning:

- The earphones cannot be soaked in sea water/salt water for a long time, and the charging magnetic part is easy to corrode. If it is not used for a long time, please charge it at least once a month.
- Please do not disassemble any parts on the product without authorization. If the product is found to be defective, stop using the product immediately and contact the seller for after-sales treatment.
- After each exercise, please wipe off the water on the surface of the earphones, especially the charging magnet, and clean it in time to prevent sweat and salt water from corroding the charging port and affecting the life of the product.
- Keep the product away from sources of fire, heat, freezing, and chemicals. It is strictly forbidden to violently impact, disassemble, assemble and extrude the product.
- Please use a charging head with an output of 5V1A or less.

FCC Statement

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC rules.

These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help. To assure continued compliance, any changes or modifications not expressly approved by the party. Responsible for compliance could void the user's authority to operate this equipment. (Example- use only shielded interface cables when connecting to computer or peripheral devices).

This equipment complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and

- (2) This device must accept any interference received, including interference that may cause undesired operation.

RF warning statement:

The device has been evaluated to meet general RF exposure requirement. The device can be used in portable exposure condition without restriction.
