3. Installation guide

1. Turn off the car engine.

2. Insert the TF card into the recorder card slot.

[Note] Please use a high-speed TF card (above Class10) with a capacity not less than 512MB, and the maximum TF card supports 64GB.

3. Attach the recorder to the original rearview mirror of the car.

4. Insert the car charger into the car cigarette lighter.

5. Use the charging extension cord to connect the USB port of the recorder to the car charger. [Note] The charging extension line can be laid along the edge of the car windshield when wiring.

6. Install the rear camera on the rear part of the vehicle, and pay attention to the direction when installing. Wiring can be laid along the ceiling of vehicles. After the installation, the rear plug is connected to the rear camera interface of the recorder.

7. Adjust the lens position to ensure that the lens remains level with the ground.

8. Start the engine and check that the machine is being installed correctly.

[Note] When the machine is installed correctly, the system work

indicator is lit; the machine starts into the recording state and the video indicator flashes. Please check whether the picture on the screen is normal. If the picture is inverted, please contact us in time.

FCC Warning

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator & your body.
