After-sales service

I . Warranty Services

1. Within 12 months from the next day after signing the receipt, after-sales service will test the product to determine if it qualifies for free repair services.
2. The warranty covers failures due to defects in product design, manufacture or materials.
3. The following are not covered by the warranty:
 - The product has not been operated in accordance with the instructions or has been used improperly;
 - The product has been disassembled or repaired by unauthorized personnel;

The product has been affected by force majeure factors such as natural disasters, vandalism, or unauthorized modifications.

II . Return and Exchange Policy

1. Conditions of return
 - If the goods are not used within 7 days from the next day after signing for the goods in new condition, and packaging, accessories complete, the user can apply for a refund or exchange.

- Quality problem: If the product can not be used normally due to manufacturing defects or transportation damage, we provide free return and exchange service within 15 days.

2. Non-returnable cases

- Artificial damage caused by improper operation of the user, including but not limited to water damage, dismantling of the shell, etc..

3. Return and exchange process

- Users are required to apply for a return or exchange through our after-sales channels within the return or exchange period.

- After the approval, the user should send the product back to the company's designated address. After confirming that the product meets the return conditions, we will refund or replace it.

4. Description of freight charges

- In case of return or exchange due to quality problems, the shipping cost will be borne by us.

- If there is no quality problem with the return or exchange of goods, the shipping cost shall be borne by the user.

5. Special provisions for electronics

- Please take care to avoid possible damage to the product caused by flooding or dropping.

III. Reminders

1. This product is only available for sale in China (excluding Hong Kong, Macao and Taiwan), so this product is only available for after-sales service in China (excluding Hong Kong, Macao and Taiwan), and this warranty is only applicable to China (excluding Hong Kong, Macao and Taiwan).

2. Do not immerse the product in water or rinse the body directly with water to avoid malfunction due to water ingress.

3. If the product is faulty, please contact customer service, do not disassemble or replace the parts by yourself.

Basic parameters

Product Name: PETA Collar

Product Model: Peta Collar 001

Battery Type: Li-ion polymer battery

Operating Temperature: -20°C~60°C

Wireless Connection: Cat-1

Main body size: L48mm × W26mm × H20mm

Input Voltage: DC 5V

Input Current: 500mA

Waterproof rating: IPX5

Battery Capacity: 350mAh

FCC WARNING

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

Any changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception,

which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.
