

### **1. Multiple reverb modes**

1. This microphone has several customized reverb modes that can be switched with one button. Whether it is an ethereal church sound effect or a shocking concert sound effect, it can be easily achieved.

2. These reverb modes are suitable for different music styles, including pop, rock, folk, etc., making your voice full of infinite possibilities.

### **2. High-quality materials**

1. The microphone is made of high-strength materials, which is not only durable, but also unique in appearance, giving people a sense of fashion and professionalism.

### **3 Reverb mode switching**

1. There is a special reverb mode switching button on the main body of the microphone. Users can switch to the desired reverb mode with one button according to their singing needs. For example, when singing pop songs, choose a reverb mode suitable for pop music to get the best sound effect.

### **4 Volume adjustment**

1. The microphone may be equipped with a volume adjustment button. Users can adjust the volume of the microphone according to the actual usage scenario to achieve the best singing and live broadcasting effect.

### **5Maintenance**

1. After use, it is recommended to wipe the microphone with a clean soft cloth to keep it clean.

2. Avoid severe impact on the microphone to avoid damage to internal components.

### **6Connecting devices**

1. Use the connection cable provided with the headset to insert the headphone plug into the audio output interface of the karaoke device (such as mobile phone, karaoke machine, etc.).

FCC Warning:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Caution: Any changes or modifications to this device not explicitly approved by manufacturer could void your authority to operate this equipment.

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 0cm between the radiator and your body.
