

A110

user's manual

hello

Thank you for buying our company dashcam. Please read the manual carefully before use and keep it for reference. If you need any assistance, please contact our customer support team.

matters need attention

- ✧ Please use our Recorder Special Adapter, our special adapter works only for our recorder, please do not give your phone or other device charged by our Recorder Special Adapter which will cause damage to your phone or other devices. If you need to purchase a car adapter, make sure to use the following specifications: input: 12~24V, output: 12V.
- ✧ Do not be exposed to heat over 50°C or direct sunlight, especially in the car.
- ✧ Do not operate the recorder while driving to avoid traffic accidents caused by distraction.
- ✧ For safety reasons, be sure to open the screen saver function during driving.
- ✧ Do not remove the TF card during the recording process.
- ✧ Prevent it from falling.
- ✧ Keep the recorder away from the water and the liquid. This may cause the recorder to fail.
- ✧ If the equipment overoverheated, produces unnecessary smoke or unpleasant smell, immediately remove from the power outlet to prevent fire hazard.
- ✧ For the first time, make sure that the equipment is firmly fixed, and then start and drive the car to prevent the equipment from falling, injuring passengers or damaging the car glass, or the equipment is damaged by the fall.
- ✧ Do not try to open the case of the recorder or repair it in any way, if the recorder has been separated, the warranty will be invalid.

structural description

Product size: DVR-3.2 inches

Model number: A110

Description: Hd dashcam

1-Camera

- "Shoot" window

2-Recorder holder

- Install and secure the recorder.

3-The LCD display screen

- A 3.2-inch HD display screen.

4-Speaker

- Sound remind.

5-Power interface-Type-C

- Connect the external power supply, including charging the battery and providing the working power supply.

6-Micro SD card slot

- Install and uninstall the Micro SD card.

7-Power key / screen backlight switch

- Function 1: switch machine function

In video mode, press [OK] to start the recording and press [OK] again to stop the recording

12-AV interface

- Rear-sight rear-pull interface,

memory card

The recorder is compatible with 16GB, 32G, and 64GB. A 128GB micro SD memory card. You must use at least a level 10 micro SD card. We strongly recommend the use of branded memory cards purchased from regular channels for maximum reliability and stability in recorded and high vibration activities.

- **Insert the Micro SD card**

Slide the memory card into the SD card slot facing the card screen label, and the card will lock in place when fully inserted. Please insert the memory card in the correct manner as described in the instructions.

If not, the card slot may be damaged by the wrong card insertion.

- **Remove the Micro SD card**

Stick the nail on the edge of the memory card, press gently, and remove the memory card.

matters need attention:

- To avoid damaging the SD card and data, do not remove or insert the SD card when the device is powered on.
- Before use, please format the micro SD memory card on the recorder.
- Please carefully remove the Micro SD card as the card may jump out and be lost.
- To keep your micro SD card in good shape, please reformat it regularly.
- Reformatting removes all content, so make sure to download these files first.

begin

- **"Automatic recording"**

Verify that the recorder is connected to a cigarette lighter socket in the car. When the car engine is started, the recorder will automatically turn on and start recording, and when the car engine is off,

The recorder will close and stop recording.

Note: The recorder does not have an internal battery and must be connected to an external power supply to operate.

Set the feature profile

debugging

Q: Why does the recorder always say "no card inserted"?

A: 1. Please ensure that the memory card is level 10 and above.

2. First, by formatting the memory card on the computer. When you format it on your computer, select FAT 32 (Default) on the file system. Then format it in the recorder.

Q: The recorder can no longer work.

A: Please check whether the memory is full. If so, please save the file and format the SD card.

Q: The image is very blurred.

A: The windshield will reflect the light, please adjust the recorder.

Q: The recorder often loses its power supply.

A: Because the vehicle design is different, please rotate the car charger for adjustment to maintain stability.

Q: The recorder cannot be opened.

A: Make sure the power supply indicator is on or off. If off, plug in the car charger and reset the recorder.

Q: None of the buttons respond.

A: Please reset the recorder to restart.

Q: When opened, the recorder will not record automatically.

A: 1. Check that the memory card is full.

2. Reformat the card. If this problem exists, replace a new card.

Q: There is no sound in this video.

A: Please confirm that the microphone is turned off.

Q: The recorder always automatically on and off.

A: Please power the recorder through the USB vehicle charger. Do not power the recorder through the USB data cable with other adapters.

Q: The recorder cam is very hot. Is this normal?

A: It is normal to use the heat in the normal temperature range. If the equipment produces unnecessary smoke or odor, it should be stopped immediately.

Q: Even if the car engine is off, the machine won't turn off.

A: If the video mode is running, the machine will not turn off even if the car engine is off and the key switch is off.

Q: The video cannot be recorded on the memory card.

Q: "Memory error" appears on the recorder screen

A: 1-Be sure to use a branded memory card. Using low cost memory cards sold in this city does not guarantee operation.

2-A possible problem with the memory card. Please format the memory card.

Q: The screen freeze / button cannot operate

A: Press the reset button on the host side to restart the system.

Specifications may need to be modified without further notice, please treat the actual product as the standard form. If you need the latest updated software, please contact our after-sales service team!

Warning:

Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user ' s authority to operate the equipment.

NOTE:

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

FCC Statement:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions , may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The equipment complies with FCC Radiation exposure limit set forth for uncontrolled environment. This equipment should be installed and operated with minimum distance 20cm between the radiator and your body.
