Long press to enter the theme import page (U disk import, scan code import) click to enter the theme settings page (default desktop settings, home page filter application menu application settings, car speed settings

Enter the theme homepage, your theme is here~

## 05 CarMate

CarMate is an assisted driving software mainly used to check driving trajectory.

Conductive

to improving driving efficiency and safety. You

need to activate and download the mobile APP and

device binding before formal use. After binding the

device, you can view the vehicle track, track playback, remote camera

and other functions, as well as share and delete.

Mobile APP download steps: Open [CarMate]-select [APP Download]

Scan the QR code with your mobile phone, and operate according to the

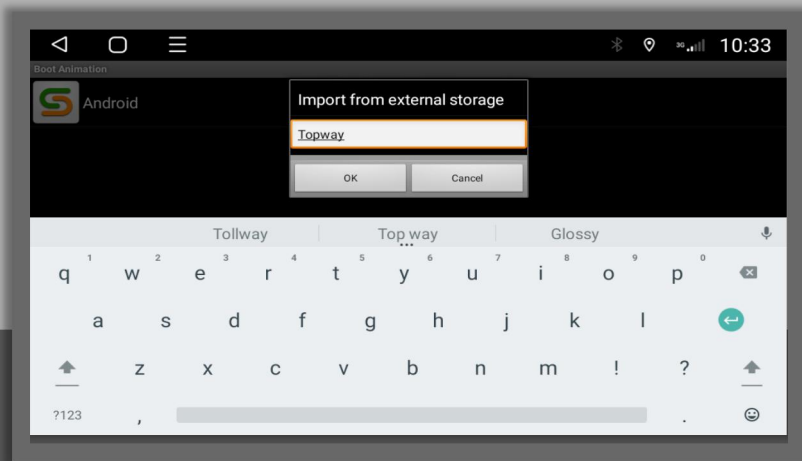

prompts.

Device binding steps: Open the mobile APP-click the scan code icon in the upper

right corner, and scan the [device binding] QR code on the car terminal. For

detailed introduction, please refer to "Car Assistant User Manual"

## 06 Boot animation

Connect the USB device containing the boot animation to the car's USB -> open the [boot animation] application -> drop down the drop-down menu -> click the menu button -> enter the password, the animation package in the USB device will be automatically synchronized

Home page

This device comes with two animation package options.

Animation setting steps: Animation name--click [OK] in the pop-up box. After setting, slide down the drop-down menu and restart the car to view it.

## 07 Music

- Play list
- Previous song
- Next song
- pause/resume playback
- Equalizer
- Lyrics settings

01 The menu on the left side of the play directory: "Playlist", "U Disk", "SD Card", "iNand" and "Favorite List".

02 Play modes include list loop, single song loop, and random play

03 When playing a song, the homepage multimedia plug-in automatically synchronizes status/information

iNand directory playback

①Connect audio U disk/SD card device--application menu--open 【File Manager】--check the audio file and click 【copy】--switch to "local"--"iNand" folder--click Paste and restart the car.

## 08 Video

Enter the video playback interface (half screen window)

01 Double-click the play window or click  to enter full-screen play, the button bar is automatically hidden, and touch the screen to pop up.

02 The rest are playlist, previous song, pause/resume, next song, equalizer, settings (video floating ball/brake), the floating ball is closed by default, after opening, play video -> HOME key, the video

The brake is set in three states: default closed, open, and speed.

 U disk playback source; connect multiple audio U disks, click to switch U disk directory, (must include audio If the file is switched to the U disk directory, no content is displayed),  SD card playback path,  iNand playback path (local).

This player supports: MP4\AVI\DVIX\FLV\MOV\MKV\3GP and other video formats

## 09 Bluetooth

## 21 Play store

It is the official application store for devices running the Android operating system, allowing users to browse, download and use applications. It is also a digital media store for the Android operating system. It contains services including Google Play Books, Google Play Games, Google Play Movies and TV and Google Play Music, allowing users to browse and download e-books, music, games, and TV series.

## 22 Chrome

Integrating resources and high-quality content, massive expansion, application downloading, video viewing, answering questions and answering questions, a good car helper.

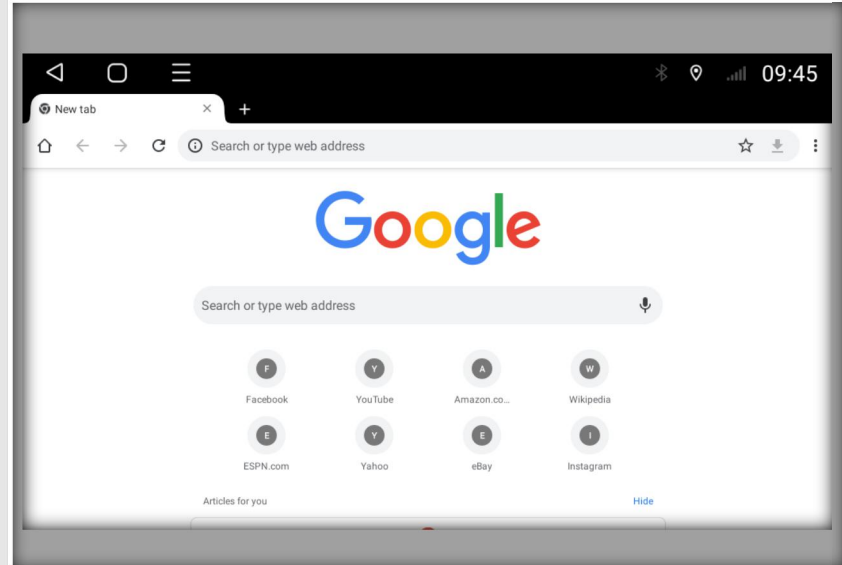

[Headline Consultation] Wonderful headlines, don't miss hot news

[Massive videos] full collection of new hot spots

[search] New consultations, exciting content, just search

[Massive Novels] Popular novels are updated faster, and reading is more worry-free

[Subscription boutique] Time tracking, high-quality account, boutique column, subscription to enjoy good content!

#### FCC Statement

This device complies with Part 15 of the FCC rules. Operation is subject to the following two conditions: 1) this device may not cause harmful interference, and 2) this device must accept any interference received, including interference that may cause undesired operation.

Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.

- Increase the separation between the equipment and receiver.

- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

- Consult the dealer or an experienced radio/TV technician for help.

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

#### FCC Radiation Exposure Statement

This device complies with FCC RF radiation exposure limits set forth for an uncontrolled environment. This transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.

This device must operate with a minimum distance of 20 cm between the radiator and user body.
