

- **433M remote control instruction manual**

Pictures of objects:

Parameters:

Product Model: MS-S14

Operating voltage: DC3V (1.5V*2 AAA button battery)

Operating current: less than 20MA when transmitting

Operating frequency: 433.92MHZ

Modulation mode: ASK

Standby current: less than 5UA

Size: 98*40.5*11mm

Product quality: 24.5g

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) this device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation

Instructions for operation:

1: Press the PLAY button, send signal, open the machine, release to stop sending.

2: Press the+key, send signal,speed+, release to stop sending.

3:Press the-key, send signal,speed-, release to stop sending.

Application production scene:

1: The treadmill remote control

2: remote control toys.

3: Smart furniture. , etc.

4:Wireless remote control

Warning:

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
(1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation

NOTE: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

Warning: changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment

The device has been evaluated to meet general RF exposure requirements, the device can be used in portable exposure conditions without restriction

Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment
