Disposal of the product and the battery according to local regulations. Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment. This device complies with part 15 of the FCC Rules and Industry Canada licence-exempt RSS standard(s). Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.
Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes: (1) l'appareil ne doit pas produire de brouillage, et (2) l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.
Um eine umweltgerechte Entsorgung sicherzustellen, entsorgen Sie bitte elektronische Geräte über eine Elektronikschock-Rückgabestelle Ihrer Gemeinde. Batterien können Sie ebenfalls an kommunalen Sammelstellen oder als kostenlose Rückgabe an den Handel entsorgen.

Battery: 1 x CR2032

The integration of the new wireless/contactless interfaces *Bluetooth*® smart and NFC into new notebooks, tablets and smartphones is the base for the next App generation (App 2.0). New solutions become possible:

blukii Development Kit

The **blukii modules** – being just 22mm in diameter – are full of state-of-the-art technologies: *Bluetooth*® smart, NFC and a motion/temperature sensor. blukii modules communicate with notebooks, smartphones and tablets. The integration of the blukii modules into other products makes these technologies easily wearable.

We therefore completely rethink the products and optimize them to suit the needs of the 21st century life. For example, the pen became the blukii pocket pen – our standard **blukii carrier product** for office applications. It includes a note pad (for making notes anywhere and at any time), blukii BTS module and blukii NFC module.

The **content** of the blukii Development Kit is constantly adapted to the state of the art with regard to development. The blukii open platform for App 2.0 is composed of

- Technology modules for *Bluetooth*® smart and NFC technology.
- Carrier products for wearing the technology modules.
- Spare parts for modules and products.
- Battery changer for changing the blukii battery.
- Development software for creating new App 2.0 solutions (available on blukii internet site)
