Re: Class II Permissive Change for ABZ89FC4823, UHF Range 1 MTR3000 Base Radio Transmitter
Addition of FCC Rule Part 22 and Rule Part 80

This memo is in regards to Motorola Solutions type approved transmitter, equipment type ABZ89FC4823, originally approved December 9, 2009. It was updated with additional emission designators on September 8, 2011.

A copy of the current FCC grant is included.

Motorola Solutions requests to have FCC rule part 22 and rule part 80 added onto the grant. Since the technical requirements in part 22 and part 80 are similar or less stringent than those in part 90, no emissions data or occupied bandwidth information is included with this request. Please refer to information on file, as needed.

No schematic, active device, or circuitry changes have been made to the equipment. This proposed change maintains the existing specifications of the equipment. The equipment will be completely compatible and interchangeable with the existing equipment currently shipped under equipment type ABZ89FC4823. The form, fit, and function of the base radio is identical to the equipment that is currently in production.

Please contact me if you need further information or have any issues or questions.

Regards,

Ken Weiss
