RE: Application for Limited Modular Approval Certification for Intel 3945abg WLAN Module

Dear Sir or Madam:

The following information addresses the requirements to support a limited modular approval as required by the FCC Public Notice DA 00-1407 "Part 15 Unlicensed Modular Transmitter".

1	The modular transmitter has its own RF shielding.
2	The modular transmitter has buffered modulation/data inputs. All inputs to the module are buffered through the radio circuitry.
3	The modular transmitter has its own power regulation. The module will be integrated in the ML910 which also offers power supply regulation.
4	The modular transmitter has a unique antenna coupler. The ML910 antenna used with the modular transmitter is described in the exhibits.
5	This modular transmitter has been tested internal to the ML910 and has also been tested in a stand-alone configuration.
6	The modular transmitter will be labeled as required. The ML910 will also be labeled as required.
7	Operational requirements have been added to the manual (refer to the User's Manual).
8	The ML910 with modular transmitter integrated meets the MPE calculations of 47 CFR 1.1307(b)(1). There will be a cautionary statement added to the manual stipulating the 20 cm separation distance (refer to the User's Manual).

If there are any additional questions or if further information is needed, please contact me at your earliest convenience at (847) 538-1808.

Sincerely,

A handwritten signature in black ink that reads "Paul Peterson". The signature is fluid and cursive, with the name written in a single, continuous stroke.

Paul Peterson
Senior Staff Engineer
Motorola Inc.
