IC: 109W-5700G Family Certification 5700G  
FCC ID: ABZ89FT7630

### **Canopy Model 5700G Cover Letter**

Motorola is filing, with the F.C.C. and Industry Canada, a new certification for Model 5700G in its Canopy family of products (Wireless Ethernet) to be now compliant with part 15.247 and RSS-210 Issue 7. Canopy is a point to multi-point wireless Ethernet distribution system. The back hauls (BH) are point to points connecting multi-point access points to wired Ethernet feeds (Internet Service Providers points of presence, ISP POP). Canopy is manufactured by Mark 4 Industries which is located in Mississauga, Ontario, Canada.

In conclusion, there is a technical brief on model 5700G with and without Canopy integral Antennas to show that we are in compliance of part 15.247 and RSS-210 Issue 7.
