

#### 7.4 Audio Accessories:

All audio accessories were considered. The table below lists the offered audio accessories and their descriptions. Based on KDB publication 643646 provisions only the default audio accessory PMMN4024A highlighted in green required testing for this product due to the low SAR results produced. Audio accessories highlighted in yellow are unique accessories that were not tested based on the allowed test exclusion provisions. Audio accessories with similar construction are noted as such in the relevant comment fields.

Exhibit 7B illustrates photos of the audio accessories considered for test.
