Columbia, MD 21046

**Subject: APPLICATION FOR CLASS 2 PERMISSIVE CHANGE TO FCC AUTHORIZED Transceiver  
with FCC ID: ABZ99FT4056**

Dear Sir / Madam,

A permissive change is requested for a 438-470 MHz 1-4 W Portable radio (the subject transceiver) which is marketed in the United States and elsewhere.

**A. DESCRIPTION OF PRODUCT CHANGES:**

The Portable radio is unchanged with the exception of new battery cells from an alternate vendor.

**B. PERFORMANCE DIFFERENCES:**

Performance data on RF exposure measurement (SAR) was obtained in accordance with 47 CFR 2.1093. All exposure measurement were performed at the Motorola Plantation Facility EME Lab, which is an FCC listed site. Attached results shows that exposure measurement (SAR) has degraded compared to the original filing but are within the FCC limits.

**C. CONCLUSION:**

This radio continues to meet all FCC emissions requirements for which authorization was granted. However, the RF exposure is degraded to those originally reported, thus this change does meet requirements for a Class-2 Permissive Change.

Sincerely,

/s/ Larry D. Larsen (signed)
