Subject: APPLICATION FOR CLASS 2 PERMISSIVE CHANGE TO FCC AUTHORIZED Transceiver with
FCCID: **ABZ99FT4057**

A permissive change is requested for ELP UHF R1 Portable (the subject transceiver) which is marketed in the United States and elsewhere.

A. DESCRIPTION OF PRODUCT CHANGES:

This is an improvement in the Mitsubishi EPP Version UHF1 Power Amplifier Module to reduce Transmit Current from 2A to 1.5A. This is a drop-in replacement by the same manufacture and in addition is lead-free. U1 Power Frequency Amplifier part number is changed from 5115849H02 to 5116757H01.

B. PERFORMANCE DIFFERENCES:

Performance data on radiated spurious emissions was obtained in accordance with 47 CFR 2.1053. All radiated emissions performance measurements were performed at the Motorola Plantation Facility OATS, which is an FCC listed site. Attached results shows that all radiated spurious emissions and conducted spurious emissions are within FCC limits but degraded to those of the original filing.

C. CONCLUSION:

This radio continues to meet all FCC emissions requirements for which authorization was granted. However, the radiated and conducted spurious emissions are degraded to those originally reported, thus this change does meet requirements a Class-2 Permissive Change.

Sincerely,

/s/Donna Tokarz (signed)
