Re: Class II Permissive Change for Transmitter with FCC ID: ABZ99FT5000

Motorola, Inc., 1309 East Algonquin Road, Schaumburg, Illinois, herein submits its Class 2 Permissive Change request for the portable transmitter with FCC ID:ABZ99FT5000 to revise frequency of operation in accordance to the 700 MHz reband.

This Transmitter is electrically unchanged and the revised frequencies of operation are controlled by Motorola software. The subject transmitter remains compliant with CFR Title 47, Section 90.203, in that the operator cannot directly program the transmit frequencies using only the normally accessible external controls of the unit.

A technical report of measured occupied bandwidth, conducted spurious emissions and radiated spurious emissions is included. The transmitter remains compliant and SAR values previously reported remain the same.

Please update the FCC files and re-issue the grant with the revised frequency of operations.

Contact me at (847) 538-2239 if you require additional information.

Sincerely,

/s/ Larry D Larsen(signed)

Larry D. Larsen
