Re: Identification Change - RadioFrame Networks Product FCC IDs changed to Motorola FCC IDs

Per CFR 47, Paragraph 2.933, Motorola respectfully requests change in identification for the indicated transmitters. Separate filing packages will follow for each transmitter.

Motorola has purchased some of the assets of a company that has FCC type accepted equipment. This company is known as RadioFrame Networks (RFN). The existing transmitters affected are as follows:

Existing FCC ID	New FCC ID	Lower (MHz)	Upper (MHz)	Product Description
PURMCSERIESSC	ABZMCSERIESSC	851.0125	868.9875	Standard Capacity
PURMCSERIESOPM	ABZMCSERIESOPM	851.0125	868.9875	Outdoor Pole Mount
PURMCSERIESHP10	ABZMCSERIESHP10	851.0125	868.9875	High Power
		935.0187	939.9812	
PURMCRB10	ABZMCRB10	851.0125	868.9875	Multi-Channel Radioblade
		935.1875	939.98125	

For each of these existing FCC IDs, the grantee code is being changed from RFN's grantee code of "PUR", to Motorola's grantee code of "ABZ". The product code is unchanged.

There is no change in design, circuitry, or construction of the unit other than the company logos and labeling.

This application package consists of the following:

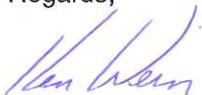

- (1) The original identification used
- (2) The date of the original grant
- (3) How the equipment bearing the modified identification differs from the original equipment
- (4) Whether the original test results continue to be representative / applicable
- (5) Exterior appearance photographs

No resubmission of equipment or measurement data is required unless specifically requested by the commission.

(Ref: CFR 47, Part 2, Section 2.929, 2.933)

Per this action, the change requested is in identification only. The equipment will be completely compatible and interchangeable with the existing equipment previously shipped by RFN. The form, fit, and function of the equipment is identical.

Please contact me if you need further information or have any issues or questions.
Regards,

Ken Weiss
