RE: FCC ID: AFJ277602_ATCB001830

Attention: Tri Luu

I have a few comments on this Application. Please note that further comments may arise in response to answers provided to the questions below.

1. Please note that page 48 of the SAR report You have "(i.e. 15mm at 835MHz) in the sentence referring to the liquid separation distance to the dipole. The report then states that 13mm at 450MHz was used. Please confirm that the "15mm at 835MHz" mentioned is strictly an example and not actual data used.
2. Please note that the manual states that in body worn configurations the transmitter is to be kept at least 2.5cm from the body. However, while you have shown testing in face position at 2.5cm, your SAR report does not show that body SAR was done at 2.5cm. Please provide a SAR report that clearly shows the worse case SAR in body configuration was done at 2.5cm.
3. Please note that the accessory use statement in the manual states to use the accessories listed on page 33. However, please note that there is no page 33 of the manual and please note that the list of accessories appears to be on pages 30 and 31 of the manual. Please correct to give accurate location of data in the manual.
4. Please provide the dipole calibration certificate and data.

A handwritten signature in black ink that reads "Dennis Ward".

Dennis Ward

The items indicated above must be submitted before processing can continue on the above referenced application. Failure to provide the requested information may result in application termination. Correspondence should be considered part of the permanent submission and may be viewed from the Internet after a Grant of Equipment Authorization is issued.

Please do not respond to this correspondence using the email reply button. In order for your response to be processed expeditiously, you must submit your documents through the AmericanTCB.com website. Also, please note that partial responses increase processing time and should not be submitted.

Any questions about the content of this correspondence should be directed to the sender.
