TO: Errol Chang  
RE: ICOM Incorporated AFJIC-R10

Errol,

The purpose of this application was for the applicant to continue to show compliance with the new scanning receiver requirements of 47CFR 15.121. My examination of the original application comparing the photographs and parts list on file with the newest production sample did not show any significant modifications in electrical or mechanical construction. In our opinion, the equipment is identical to the original filing.
