To Whom it May Concern;

We are seeking certification for the WhisperRx FCC ID AHTWRX, under FCC 15.249. The device receives animal lungs sounds that were recorded and transmitted by the Whisper Veterinary Stethoscope. The WhisperRx uses a 2.4GHz single chip transceiver from Nordic Semiconductor (nRF24L01+) to communicate with the Whisper Veterinary Stethoscope which has the same transceiver. The device is powered by the USB port of the PC and has been DoC authorized as a PC peripheral.

This device uses a PCB antenna that is integral to the unit.

Sincerely,

A handwritten signature in blue ink, appearing to read "Randolph K. Geissler", written over the printed name.

Randolph K. Geissler
