

RF Exposure / MPE Calculation

No. : 30GE0005-HO-01-B-R1

Applicant : Sony Computer Entertainment Inc.
Type of Equipment : Wireless Controller
Model No. : CECH-ZCM1U
FCC ID : AK8CECHZCM1
IC Number : 409B-CECHZCM1

Sony Computer Entertainment Inc. declares that Model : CECH-ZCM1U complies with FCC radiation exposure requirement specified in the FCC Rules 2.1093(for portable)/2.1091 (for mobile).

The “CECH-ZCM1U“ has 1.33 mW of conducted Peak Output power and 1.46 mW of EIRP. This kind of equipment is below 60/frequency[GHz] mW(TCB Exclusion List) so that SAR testing is excluded. The Following calculation is the reference data for 20cm distance.

RF Exposure Calculations:

The following information provides the minimum separation distance for the highest gain antenna provided with the “CECH-ZCM1U“ as calculated from FCC OET Bulletin 65 Appendix A, Table (B) Limits for General Population / Uncontrolled Exposure. This calculation is based on the highest EIRP possible from the system, considering maximum power and antenna gain, and considering a 1.0mW/cm² uncontrolled exposure limit. The Friis formula used was:

$$S = (P * G) / (4 * \pi * r^2)$$

Where

P = 1.33 mW (Maximum peak output power)
G = 1.10 Numerical Antenna gain; equal to 0.40 dBi
r = 20.0 cm

For: CECH-ZCM1U

$$S = 0.00029 \text{ mW/cm}^2$$
