Model Name

Lot Number

Minimum character size of the Laser Maker is pitch 0.68mm, height 0.80mm

M/N : CXN5100

2.72mm 0.5 gap 4.76mm

7.98mm(11 characters + gap)

FCC ID: AK8CXN5100
11.56mm (17 characters)
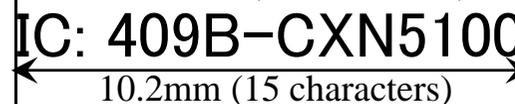

IC: 409B-CXN5100
10.2mm (15 characters)

This Picture shows the module label information, actually it is a "Laser Making" on a shield case of the module.

The FCC ID / IC Number of this module is shown on the user manual of the final product based on KDB No.784748 Section 2.2 because of the reasons below;
 - FCC ID / IC Number character length will be over 9.6mm (the shield case width). Minimum character pitch of the Laser maker we use is 0.68mm.
 - And also, the size of this modular transmitter is too small for the FCC ID / IC Number to be readable.
So, please refer to the user manual of the final product.

If the FCC ID / IC Number is not visible when the module is installed inside another device, then the outside of the device into which the module is installed must also display a label referring to the enclosed module: If FCC ID / IC Number is not visible,
The FCC ID / IC Number will also be displayed on the host device. Please refer to the installation manual.
