Hi Mr. Miura,

Please address following issues.

Q#1: Part 15.19 statement shall be on the product but not the user manual since the EUT is large enough. Also, FCC label shall be on the EUT where is always visible. And compared to EUT photos, the battery compartment as shown in the exhibit of label is the location of GPS antenna as illustrated in the EUT photos. Please have a check and provide an updated label format and re-assign the label location.

Q#2: Per the antenna specificaiton, the maximum antenna gain shall be -2.3dBi instead of -2.6dBi as listed in page 4 of the test report.

Please correct.

Q#3: Please provide an updated test report by removing EUT photo and test setup photos because both of them are asked for short-term confidentiality.

Q#4: Please provide an additional document or revised technical description to include information describing compliance with the requirements of 15.247(a)(1), 15.247(g) and 15.247(h).

Best Regards,

Lucy Tsai
