

## **RF Exposure / SAR Statement**

**No. : 27LE0042-YK-A**

**Applicant : Sony Corporation**  
**Type of Equipment : Portable Stereo Transmitter**  
**Model No. : TMR-BT10A**  
**FCC ID : AK8TMRBT10A**

---

Sony Corporation declares that Model : Portable Stereo Transmitter complies with FCC radiation exposure requirement specified in the FCC Rules 2.1091. The "TMR-BT10A" has 0.81 mW of conducted Peak Output power and 1.01 mW of EIRP. The Following calculation is the reference data for 20cm distance for mobile use.

### **RF Exposure Calculations:**

The following information provides the minimum separation distance for the highest gain antenna provided with the "TMR-BT10A" as calculated from FCC OET Bulletin 65 Appendix A, Table (B) Limits for General Population / Uncontrolled Exposure. This calculation is based on the highest EIRP possible from the system, considering maximum power and antenna gain, and considering a 1.0mW/cm<sup>2</sup> uncontrolled exposure limit. The Friis formula used was:

$$S = (P * G) / (4 * \pi * r^2)$$

**Where**

**P = 0.81 mW (Maximum peak output power)**  
**G = 1.26 Numerical Antenna gain; equal 1.00 dBi**  
**r = 20.0 cm**

**For: TMR-BT10A**

$$S = 0.00020 \text{ mW/cm}^2$$
