Wireless Noise Canceling Stereo Headset

Model: YY2984

The term "product" in this document refers to the unit or its accessories.

FOR UNITED STATES CUSTOMERS. NOT APPLICABLE IN CANADA, INCLUDING IN THE PROVINCE OF QUEBEC.

POUR LES CONSOMMATEURS AUX ÉTATS-UNIS. NON APPLICABLE AU CANADA, Y COMPRIS LA PROVINCE DE QUÉBEC.

Owner's Record
Record the model and serial numbers in the spaces provided below and store them safely. Refer to them whenever you call your Sony dealer regarding this product.

Model No. _____
Serial No. _____
The model and serial numbers to be recorded are located in the following places:
• See Fig. A

The nameplate and important information concerning safety are attached in the following locations:
See Fig. A

Do not install the product in a confined space, such as a bookcase or built-in cabinet.

Do not expose the batteries (battery pack or batteries installed) to excessive heat, such as sunshine, fire or the like, for a long time. Do not subject the batteries to extreme low temperature conditions that may result in overheating and thermal runaway.

Do not dismantle, open, or shed secondary batteries. In the event of a secondary battery leaking, do not allow the liquid to come in contact with the skin or eyes. If contact has been made, wash the affected area with copious amounts of water and seek medical advice.

Secondary batteries need to be charged before use. Always refer to the manufacturer's instructions or product manual for proper charging instructions. After extended periods of storage, it may be necessary to charge and discharge the secondary batteries several times to obtain maximum performance. Dispose of properly.

Charging this unit
Use the supplied USB Type-C® cable and a commercially available USB AC adaptor. Connect the USB AC adaptor to this unit using the USB Type-C cable, then connect the USB AC adaptor to an AC outlet.

DISPOSAL OF RECHARGEABLE BATTERIES
You can help preserve our environment by returning your used rechargeable batteries to the collection and recycling location nearest you. For more information regarding recycling of rechargeable batteries, visit www.sony.com/ecotrade. Caution: Do not handle damaged or leaking rechargeable batteries.

FOR UNITED STATES CUSTOMERS. NOT APPLICABLE IN CANADA, INCLUDING IN THE PROVINCE OF QUEBEC.

POUR LES CONSOMMATEURS AUX ÉTATS-UNIS. NON APPLICABLE AU CANADA, Y COMPRIS LA PROVINCE DE QUÉBEC.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this unit.

Supplier's Declaration of Conformity

Trade Name: SONY

Model: YY2984

Responsible Party: Sony Electronics Inc.

Address: 16535 Via Espino, San Diego, CA 92127 U.S.A.

Telephone Number: 858-942-2230

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- (1) This device may not cause harmful interference, and
- (2) this device must accept any interference received, including interference that may cause undesired operation.

NOTE:

This unit has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This unit generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications.

However, there is no guarantee that interference will not occur in a particular installation. If this unit does cause harmful interference to radio or television reception, which can be determined by turning the unit off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the unit and receiver.
- Connect the unit into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This unit must not be co-located or operated in conjunction with any other antenna or transmitter.

For customers in Canada

This unit contains licence-exempt transmitter(s)/receiver(s) that comply with Innovation, Science and Economic Development Canada's licence-exempt RSS(s). Operation is subject to the following two conditions:

- (1) This unit may not cause interference; and
- (2) This unit must accept any interference, including interference that may cause undesired operation of the unit.

The available scientific evidence does not show that any health problems are associated with using low power wireless devices. There is no proof, however, that these low power wireless devices emit low levels of radio frequency energy (RF) in the microwave range while being used. Whereas high levels of RF can produce health effects (by heating tissue), exposure of low-level RF that does not produce heating effects causes no known adverse health effects. Many studies of low-level RF exposures have not found any biological effects. Some studies have suggested that some biological effects might occur, but such findings have not been confirmed by additional research. The unit has been tested and found to comply with FCC/ISED radiation exposure limits set forth for an uncontrolled environment and meets the FCC radio frequency (RF) Exposure Guidelines and RSS-102 of the ISED radio frequency (RF) Exposure rules.

High volume may adversely affect your hearing, or cycling. Doing so may cause traffic accidents.

Do not use in hazardous areas unless the surrounding sound can be heard.

The unit is not waterproof. If water or foreign matter enters the unit, it may result in fire or electric shock. If water or foreign matter enters the unit, stop use immediately and consult your nearest Sony dealer. In particular, be careful in the following cases.

- When using the unit near a sink or liquid container. Be careful that the unit does not fall into a sink or container filled with water.
- When using the unit in the rain or snow, or in humid locations
- When using the unit while you are perspiring. If you touch the unit with wet hands or put the unit in the pocket of a damp article of clothing, the unit may get wet.

For details on the effects of contact with the mobile phone or other wireless devices connected to the unit, refer to the instruction manual of the wireless device.

Never insert the USB plug when the unit or charging cable is wet. If the USB plug is inserted while the unit or charging cable is wet, a short circuit may occur due to liquid (tap water, seawater, soft drink, etc.) or foreign matter on the unit or charging cable, and cause abnormal heat generation or malfunction.

This product has magnet(s) which may interfere with pacemakers, programmable shunt valves for hydrocephalus treatment, or other medical devices. Do not place this product close to persons who use such medical devices. Consult your doctor before using this product if you use any such medical device.

Note about static electricity
If you use the unit when the air is dry, you may experience discomfort due to static electricity accumulated on your body. This is not a

malfunction of the unit. You can reduce the effect by wearing clothes made of natural materials that do not easily generate static electricity.

IMPORTANT

The factory default setting of the voice guidance for this unit is English.

The voice guidance can be heard from the unit in the following situations:

- When the remaining battery level is low and recharge is recommended: "Low battery"
- When automatically turning off due to low battery: "Battery is empty"
- When checking the remaining battery level by pressing the POWER button while the unit turns on: "Battery fully charged" / "Battery about 90%" / "Battery about 80%" / "Battery about 70%" / "Battery about 60%" / "Battery about 50%" / "Battery about 40%" / "Battery about 30%" / "Battery about 20%" / "Battery about 10%"
- When entering pairing mode: "Pairing"
- When the USB cable is connected to the headset and a charging error or temperature error occurs during use: "Charging stopped. To resume charging, disconnect the USB cable and wait before trying again"

Precautions

The URL on the cover will help you access the help guide that describes useful notes or procedures in details.

On BLUETOOTH® communications

- Microwaves emitting from a Bluetooth device may affect the operation of electronic medical devices. Turn off this unit and other Bluetooth devices in the following locations, as it may cause an accident:
 - in hospitals, near priority seating in trains, locations where inflammable gas is present, near automatic doors, or near fire alarms.
- The audio playback on this unit may be delayed from that on the transmitting device, due to the characteristics of Bluetooth wireless technology. As a result, the sound may not be in sync with the image when viewing movies or playing games.

On charging the unit

- After charging is complete, disconnect the USB Type-C cable.
- While connecting the USB cable, do not apply excessive force to the connection part.
- When connecting or disconnecting the USB cable, do not apply excessive force, such as by pulling the cable, and connect or disconnect the connector straight to the port to be connected.
- If the USB cable connector is deformed, such as by it being bent, stop use immediately.

On using the unit while charging

- While liquid such as water or sweat, or foreign matter such as dust is attached to the USB Type-C cable or USB port, charging the unit may cause serious accidents such as burns or injuries due to fire, electric shock, heat generation or ignition, or can be the cause of a malfunction. Note the following when you use the unit while charging:
 - If you feel any abnormality, stop using immediately.
 - Check that there is no dust or foreign matter inside.
 - If the USB cable or port gets wet due to liquid such as drinking water or sweat while charging, disconnect the USB cable from the connected device immediately to stop charging (Fig. B).

Notes on wearing the unit

- After use, remove the headphones slowly.
- Because the headphones achieve a tight seal over the ears, forcibly pressing them against your ears or quickly pulling them off can result in eardrum damage. When wearing the headphones, the speaker diaphragm may produce a click sound. This is not a malfunction.

Other notes

- When you use the unit as wired headphones, use the supplied headphone cable only. Make sure that the headphone cable is firmly inserted.
- When disconnecting the cable, pull it out by the plug, not the cable. Otherwise the cable may break.
- When connecting the cable, make sure to fully insert the plug into the jack. If the plug is not fully inserted, the sound may not be output.
- Do not subject the unit to excessive shock.
- Do not apply weight or pressure to the unit for long periods, including when it is stored, as it may cause deformation.
- If you experience discomfort while using the unit, stop using it immediately.
- If you have any questions or problems concerning this unit that are not covered in this manual, please consult your nearest Sony dealer.

Specifications

Headset

Power source:

- DC 5 V / 1.5 A (Using a commercially available USB Normal AC Adaptor)
- DC 5 V / 1.5 A and 9 V / 2.3 A (Using a commercially available USB Power Delivery AC adaptor)
- or use built-in lithium-ion batteries (Product Operation Power: DC 3.8 V)

Operating temperature:

- 0 °C to 40 °C (32 °F to 104 °F)

Rated power consumption:

- 21 W

Mass:

- Approx. 254 g (9 oz)

Included items:

- Wireless Noise Canceling Stereo Headset (1)
- USB Type-C® cable (USB-A to USB-C®) (1)
- Headphone cable (1)
- Carrying case (1)
- Documents (1 set)

Communication specification

Communication system:

- Bluetooth Specification version 5.3

Output:

- Bluetooth Specification Power Class 1

Frequency band:

- Bluetooth: 2.4 GHz band (2 400.0 GHz - 2 483.5 GHz)

Design and specifications are subject to change without notice.

System requirements for battery charging using USB

USB AC adaptor:

A commercially available USB AC adaptor capable of supplying an output current of 1.5 A or more.

Commercially available AC adaptor compatible with USB PD (USB Power Delivery):

It is recommended that you use the adaptor whose output is 5 V / 2 A or 9 V / 3 A. We do not guarantee the operations with all the devices compatible with USB PD.
