1. The RF report does not indicate why the radiated test is being performed in this C2PC, and indicates that no accessories were used or which of the batteries and/or antennas which are part of this C2PC have been included and/or tested. Additionally the RF report is only for Model NX-320-K2, but the SAR report is for NX-320-K, NX-320-K2 and NX-320-K3.

**CT – Added additional model variants to the RF Test Report.**

The Class 2 Permissive Change cover letter explains the accessories changed. Since the antenna addition is the only change that would affect the RF emissions, Radiated measurements were taken.
