Subject: Response to Inquiry to FCC (Tracking Number 595339)

Inquiry on 09/05/2017 :

Inquiry:

Dear Sir/Madam,

As per the product ID design concept, the cover parts are of arc surface which is difficult for production printing

There is only very small part of place as attached label artwork can be printed of product information.

So shall we print the FCC statement in the user manual?

Thanks!

FCC response on 09/06/2017

If the device is considered too small and therefore it is impractical (smaller than the palm of the hand) to display the compliance statement, then the statement may be placed in the user manual or product packaging. However, the device must still be labelled with the FCC ID.

Labeling guidelines can be on our web site at www.fcc.gov/oet/ea click on KDB Publication 784748

---Reply from Customer on 09/06/2017---

Dear Sir/Madam,

the EUT is greater than the palm of the hand, but since the EUT is not flat, and it's tilted, so it's hard to print the statement. So, could we print it to the user manual?

---Reply from Customer on 09/06/2017---

Dear Sir/Madam,

the device is greater than the palm of the hand, but the surface is not flat and don't have enough space to print the statement in the device, So could we only print the FCC ID in the device and print the statement in the user manual?

FCC response on 09/11/2017

Yes that's fine the statement can go in the manual and the FCCID on the device.
